

DELUXE NUMEROLOGY REPORT

A PERSONAL READING PREPARED FOR:

SHLOMI FISHMAN

Born November 24, 1987

FULL BIRTH NAME:

Azriel Shlomo

26 PERSONALIZED AND
DEEPLY-REVEALING SECRETS
ABOUT WHO YOU *REALLY* ARE

The background is a complex, abstract composition. It features a dense network of blue and purple lines forming a web-like structure. Overlaid on this are various geometric shapes, including triangles and hexagons, some of which are filled with a grid pattern. A prominent feature is a hand, rendered in a dark purple color with yellow outlines, reaching upwards from the bottom right. The hand is positioned as if it is interacting with or holding a glowing, pink, spiral-shaped object that resembles a DNA helix or a stylized flower. The overall color palette is dominated by purples, blues, and pinks, with some yellow and orange accents. The text 'TABLE OF CONTENTS' is centered within a large, dark purple circle that has a subtle grid pattern.

**WELCOME TO
YOUR DELUXE
NUMEROLOGY
REPORT!**

Congratulations, Shlomi!

You're now the proud owner of your Deluxe Numerology Report, a simple yet deeply-revealing review of your personal Numerology chart. We're so pleased you've decided to bring this magical, fun and insightful tool into your life.

You see, Shlomi, we believe that Numerology is the key that will help you unlock a life filled with joy, love and prosperity. Once you have the tools to better understand what has been standing between you and your goals, you'll be able to make better choices, stop repeating destructive or self-defeating patterns, and move confidently towards a healthy and successful future.

Every part of your Numerology chart has been tailored to you personally. We've accumulated years of research, published and unpublished, by professional Numerologists and paired this insight with our precise calculation system to create an insanely powerful and accurate report all about you!

In the following pages, you'll uncover personalized Numerology readings that explain your:

- Unique name-print, including your full name reading, your first, middle and last name readings, as well as your personal cornerstone reading...
- Soul Urge Number and Challenge...
- Personality Number and Challenge...
- Expression Number and Challenge...
- Life Path Number and Cycles, including your Pinnacles...
- And last, but definitely not least, your Achievement Number.

It has been said that you can't control the wind, but you can control your sails. We sincerely hope this report will help to steer your ship of life toward the shores of success and satisfaction.

Numerology is a very powerful and insightful tool and it can also be a lot of fun! As you'll soon discover, we've done everything in our power to make the study and symbolism of numbers easy to understand and apply to your own life.

Enjoy learning about who you really are, and the numerous ways in which you can improve your overall happiness and wellbeing through the enlightening art of Numerology!

Many Blessings,

The Numerologist Team

The background is a dark, textured surface covered with various numbers (0-9) and symbols. These elements are interconnected by a network of glowing lines in shades of blue, green, purple, and orange. A bright, warm light source is visible in the upper right corner, creating a lens flare effect. A large, solid red circle is centered on the page, serving as a backdrop for the title text.

ABOUT NUMEROLOGY

WHAT IS NUMEROLOGY?

Numerology, as you are likely aware, is the study of numbers and their symbolism. This is a fascinating science (and art!), because everything in existence can be broken down into numbers, including words and the names of people, places, and things.

As mathematicians say, *"Numbers are the universal language,"* and numerology translates this language to reveal an underlying order and pattern to things we cannot see or understand at first glance.

The term "Numerology" was first coined by Dr. Julia Seton in a book she published around 1937. Before this, numerical divination was referred to as the Science of Numbers or Arithmancy. Most ancient sources of divination involved some type of numerical system. The Arabs, Indians, Greeks, Chaldeans, Mayans and religions such as Taoism, have all relied on different systems and methods of Numerology throughout history and still today, with the help of a well-rounded and conscientious practitioner, it can bring profound wisdom into your life.

Numerology is an intuitive and reliable way to study your experiences in the world. You can uncover secrets that lead to self-knowledge, and you might even find that underlying cycles and patterns start to appear. Understanding these patterns can help you align with the cycles of nature so you can flow with the current of life, instead of against it. Learning this tool can also help you read people and see what makes them tick. Numerology is an excellent road map that can show you how to navigate the course of daily life.

Numerology emphasizes your strengths and helps you to overcome your weaknesses. It can be utilized as a guide to seize opportunities that you might otherwise miss.

Understanding how numbers work in your life will awaken your inner "soul" or "spirit" and allow you to get in touch with your sixth sense. By putting a little time and effort into studying this fascinating subject, your life will run more smoothly, and it will be easier to create the future you deserve.

Continue reading to discover key numerology terms that will appear throughout your report. Enjoy!

YOUR NUMEROLOGY GLOSSARY

Throughout the upcoming report, you will be introduced to new words and terms that are specific to the study of Numerology.

In order to make it a little easier for you to understand your personal Numerology Chart, we've put together a glossary of the terms you'll come across. Feel free to reference this glossary anytime you come across a term you're unsure of.

Fadic Numbers:

These are the single digit numbers from one to nine. When a larger number sums to a single number, the Fadic number of that vibration is the final total.

Example of Fadic Numbers: 1, 2, 3, 4, 5, 6, 7, 8, 9

Example of Reduced Fadic Numbers:

$$7 + 8 = 15$$

Then,

$$1 + 5 = 6$$

Karmic Numbers:

This term describes the numbers 13, 14, 16 and 19, which have special characteristics discrete from their Fadic number, or the digits that make them up.

Master Numbers:

This term describes all "doubled" numbers, from 11 - 99. They possess characteristics that are entirely different from either the single digit, Fadic Number. In the case of this report, we consider 11 and 22 Master Numbers worth studying.

Example of Master Numbers:

11 and 22

Compound Numbers:

Any of the numbers from 10 to 98 that are neither Karmic nor Master Numbers. They are usually defined via a combination of their individual digits and their Fadic Number, and don't possess special or individual characteristics.

DETERMINING CONSONANTS & VOWELS IN YOUR READING

There is some debate in Numerology circles about whether “y” and “w” are vowels or consonants. Most Numerology books count both letters as consonants, but most of these books do not take into account certain language-specific factors. Some argue that “w” is a consonant on the grounds that it was adapted from the “double V” letter used in a few European languages; on the other hand, in English it is called “double U”, where “u” is a vowel. Strictly speaking, w and y are what are known as “glides” or “semivowels.” These are letters which in pronunciation sound similar to vowels, but otherwise function as consonants within the word. This is always true for w in English, where it does not usually appear in the places that vowels are normally found; the same is generally true for y, with the exception that it can function as a vowel in one context, specifically at the end of a word. There are a few Numerologists who recognize this, and therefore always use these two letters as consonants.

We are aware of only one researcher, Kevin Quinn Avery, D.Ms., who provides a functional solution to this problem. In his incredible textbook, *The Numbers of Life*, he posits the following rules: first, y is considered a vowel if it is adjacent to a vowel (as in ‘money’) or if it occupies the vowel slot in a syllable (as in ‘happy’). w is considered a vowel when it is adjacent to and sounded as part of another vowel (as in ‘brawl’). These rules are, of course, based on modern English; however, it is a good working solution to this problem, and by using this method the classification of the semivowels y and w becomes more straightforward.

Having said all of the above, in Numerology, Astrology and other kinds of esoteric inquiry, there is only one steadfast rule: that of experience. Indicators should be specific, and applied objectively to the subject of inquiry. In other words, the information associated with numbers should naturally describe the character of the person under investigation; it should not be manipulated to make them fit. In the end, we have found in over 30 years of research and across thousands of case studies that the information associated with the Soul Urge and Personality Number (as discrete subjects of inquiry) best align with an individual’s character when y and w are counted as vowels.

UNDERSTANDING YOUR DELUXE NUMEROLOGY REPORT

Shlomi, your Numerology report is a complete and wide ranging study of various Numerological methods that are applied to both your birth date and your name.

There are essentially 2 studies involved in creating a thorough study of personal Numerology. They are the study of your unique Name and the study of the Life Path, which analyzes your day and date of birth.

Your personal name is used to provide a few key readings in this report, including your Expression, Soul Urge and Personality numbers. We have also calculated your First, Middle, Last name and Cornerstone readings. As you'll soon discover, **your name has to do with the ways and reasons you project what you do into the world.** It's all about the choices you make and it's the easiest aspect of your life that you can use to mold your future.

Your date of birth and the numbers derived from it show what you receive from the world, which is the result of what you project into it, even if you don't feel like you had any part in creating the experiences you encounter. In other words, your Life Path and the vibrations that are subsets of it, are like "magnetic" forces that draw various vibrations, events and circumstances into your life.

It may seem impossible now, but you'll soon discover how you can make changes to live the life you want.

At Numerologist.com, we use the Pythagorean numerology system to calculate your personal readings. Pythagoras was a well known philosopher and scientist who believed that "all things are numbers". In other words, he tapped into the greater awareness that everyone and everything vibrates at a certain frequency, and numbers are a method used to measure and communicate these frequencies.

From his theory, the Pythagorean Alphabet was born and this is the alphabet we use to calculate your personal readings.

The Pythagorean Alphabet is unique because it assigns a certain numerical value to each number of the alphabet. Here's a breakdown of the values assigned to each letter using this system:

1 = A, J, S

5 = E, N, W

9 = I, R

2 = B, K, T

6 = F, O, X

3 = C, L, U

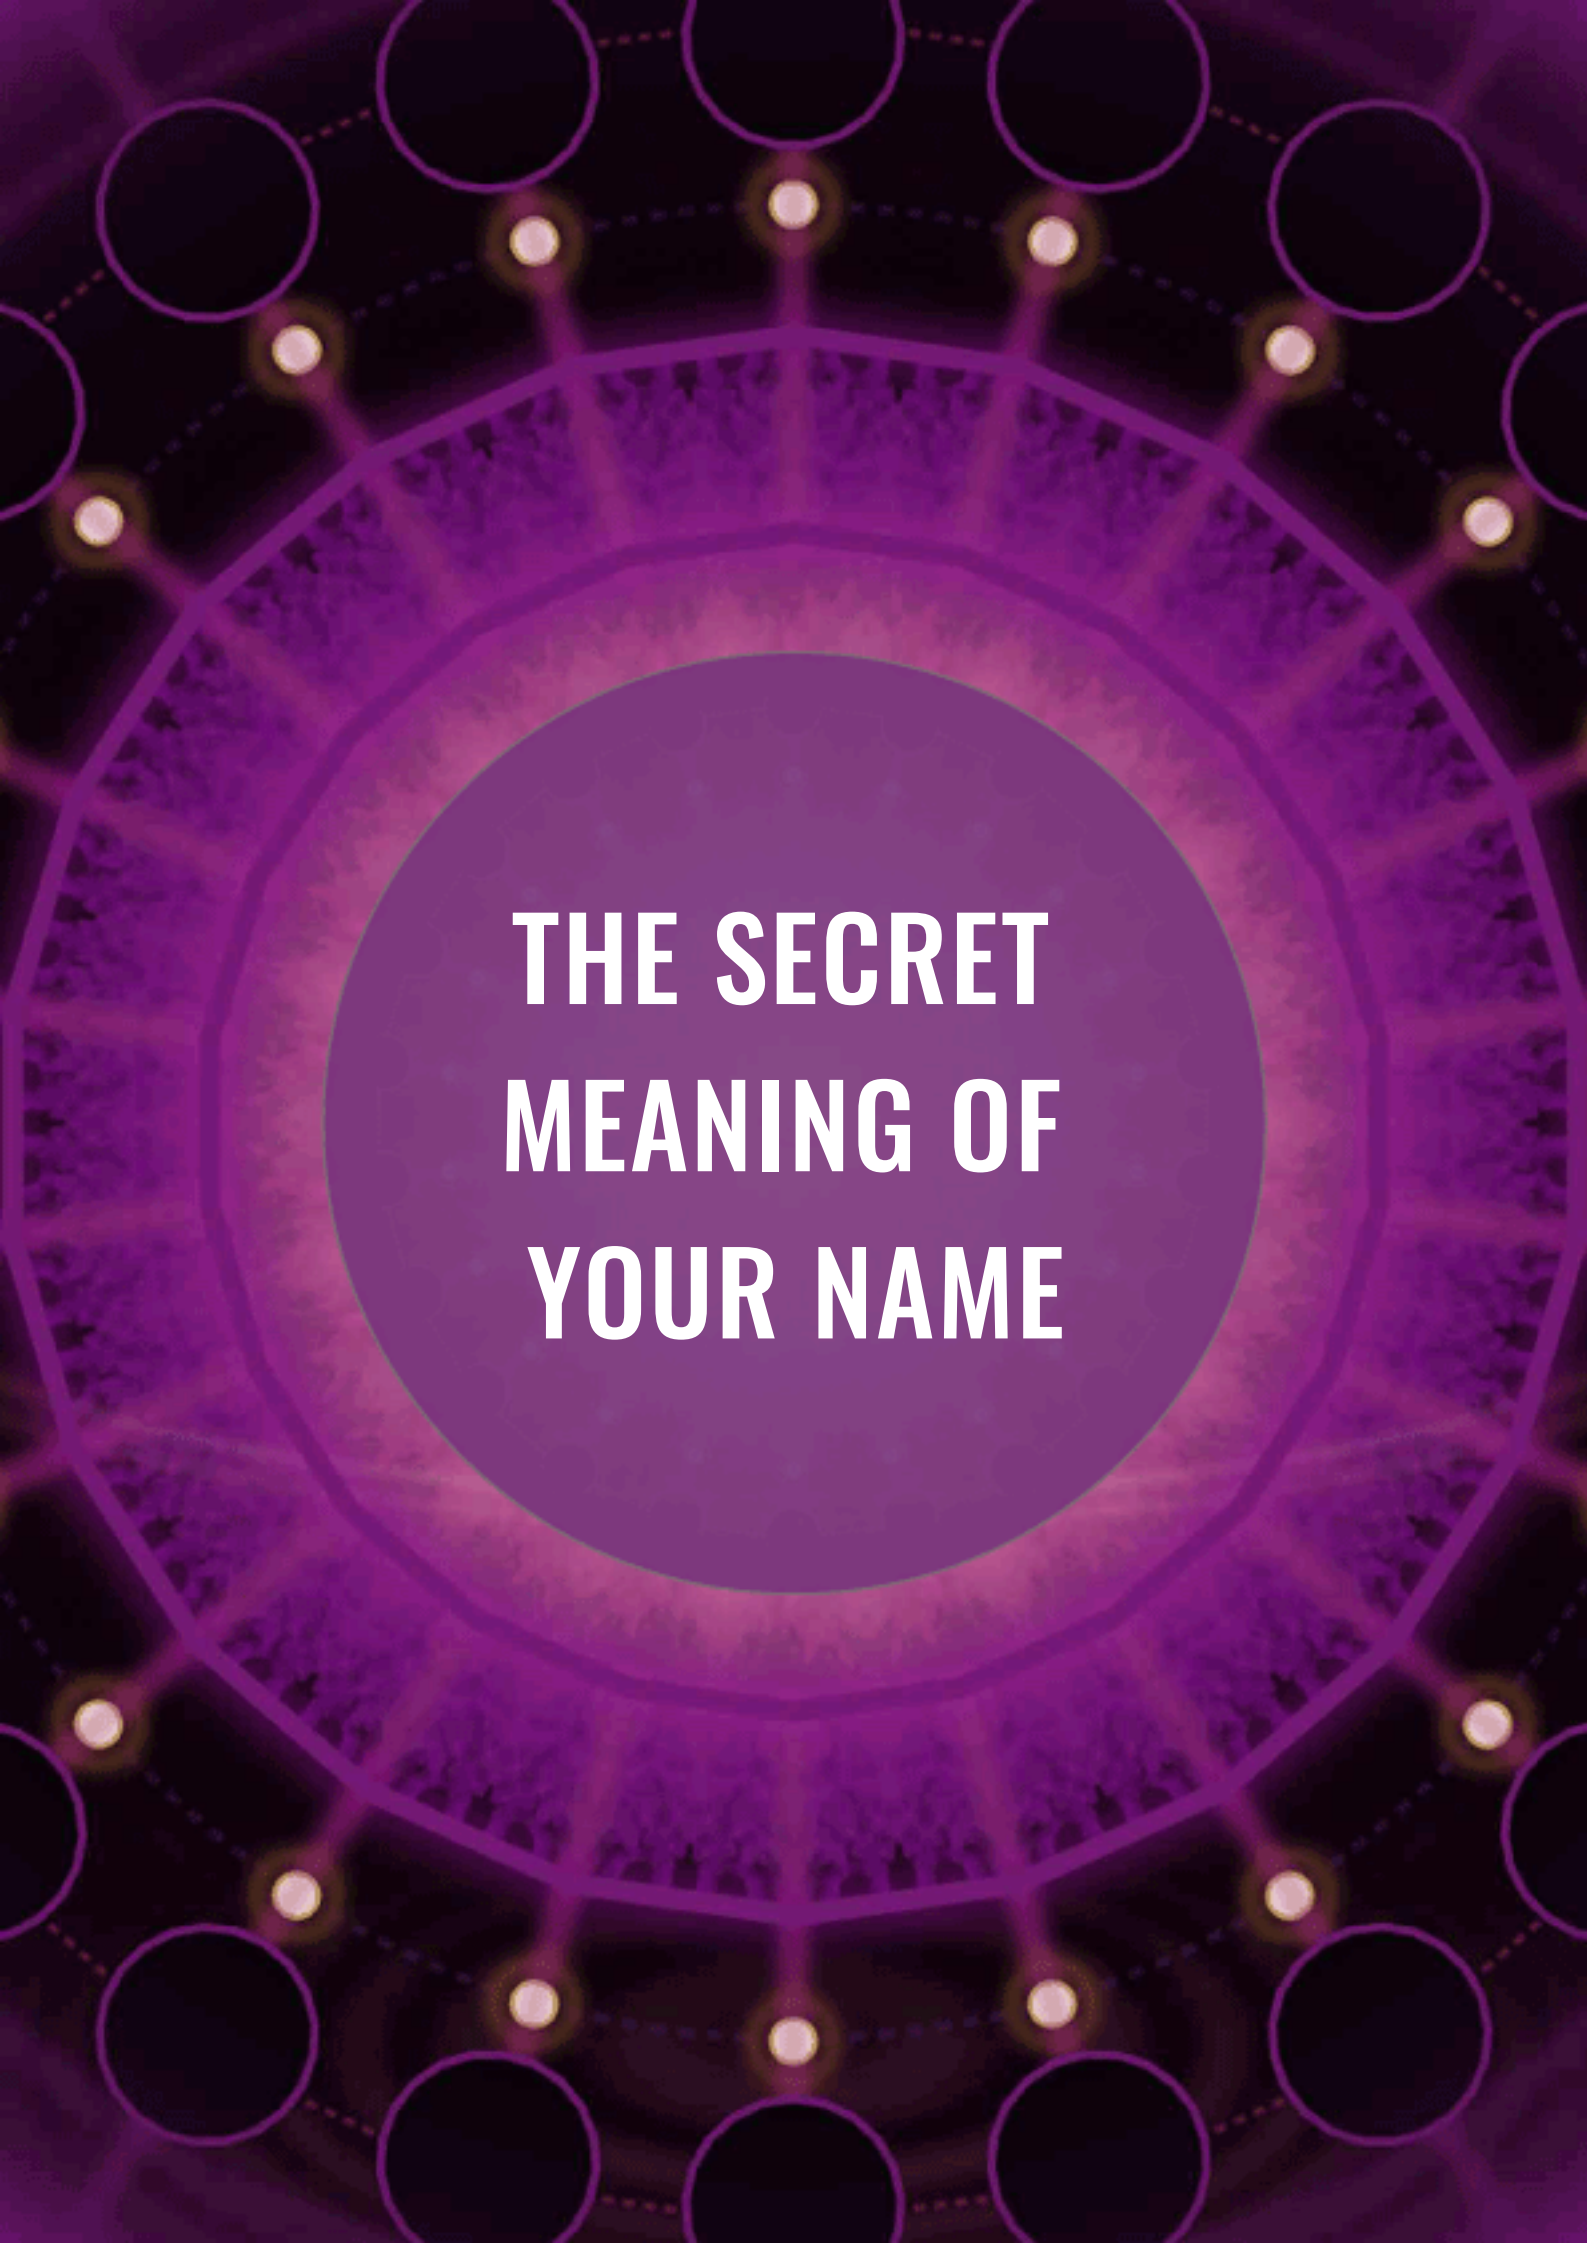

7 = G, P, Y

4 = D, M, V

8 = H, Q, Z

Fortunately, we've done all of the hard work for you by calculating all of your personal numerology numbers in this report.

Now it's time for you to dive into your Deluxe Numerology Report where you'll learn more about this fascinating science, all **while discovering your unique numerological-print.**

THE SECRET MEANING OF YOUR NAME

THE SECRET MEANING OF YOUR NAME

According to a number of mystical doctrines, all words have power. In some traditions, words have the power to create and destroy, and you may have encountered this phenomenon when interacting with people who possess great personal power. Words identify and describe objects, actions and states in such a way that the most complex concepts can be explained to those who haven't experienced them directly by merely choosing the right words to use. In many traditional societies, and even in the worlds of modern academics, business and science, the words you use define your level of knowledge and experience. It might be said that words are keys with which we create different kinds of experience — they are keys that open the doors to the life you want.

The most important thing to know about words is that they are something we use consciously every day - words are a control system for our personal magic. This may seem obvious, but you may not realize that the most powerful word in your personal universe is your name.

Your name is the first gift you received after birth, and it was chosen specifically for you. Sometimes we choose our own names. Through the laws of correspondence, a name contains within it the power of choice. **Your name, when analyzed using arithmetic methods, can help you understand how to best empower your actions so that they result in what you want.** In order to use your name properly as a tool, you need to understand the powers, or symbols, from which it is constructed.

If you aren't conscious of the potential inherent in your name, you'll tend to make too many choices based on the ideas and opinions of others, some of which may be in direct conflict with your own best interest. However, **when you become conscious of this hidden power, you can make changes in your behavior and the world around you that are favorable to you,** because you now have the "right tools for the right job" and know how to access them.

It can't be emphasized often enough that the power to create the future you want lies within you; through an understanding of the power in your name, you'll acquire some keys that can help you unlock your inner treasures and bring some real magic into the world.

THE MEANING OF YOUR EVERYDAY NAME

Your Everyday Name is the name you're usually called, and sometimes the name by which you are known in business. It represents the general aspects of yourself that you choose to project to others. In doing so, you set an agenda for your interactions with them and with the world at large.

The most important thing about the Everyday Name is that it involves your choice as to which aspects of your personality are put on display, and which you decide to keep to yourself, whether consciously or unconsciously. It also acts as an energetic barrier, primarily to buffer things that may harm the inner self.

In most cases, the Everyday Name is the one that is changed or adopted so that we seem more personable and sociable to others. Sometimes the Everyday Name and the Full Name are the same, but more often than not, they aren't. So let's explore your Everyday Name a bit to see what it is about yourself that you have chosen to reveal to others.

We've calculated the meaning of your Everyday Name by calculating the reduced sum of the letters in your first and last name. Continue reading below for your personalized reading.

Your Everyday Name Number

Shlomi, your Everyday Name Number is 11.

Since you have chosen an Everyday Name vibration of the Master Number Eleven, you are probably no stranger to the fact that others think of you as inspiring and something of an oddball. This is not a bad thing, unless they start depending on what they perceive to be your visionary nature, which may be little more than a good imagination on your part. It's likely that if you let others exploit your ideas, you'll end up finding yourself in difficult situations more often than not.

You might occasionally be accused of thinking that "the rules don't apply to me", even if you don't know how they got that idea. You'll have to fight the impression others may have that you are special, because that misperception can harm your relationships and your prosperity. Make it clear that you're imaginative, and you'll thrive in all situations.

THE MEANING OF YOUR FIRST NAME

As you may have guessed, your First Name is your social name – the name which you use in social or public situations. Your situation at work, with friends, at parties and almost all social or casual situations is influenced strongly by what you project through your First Name vibration. In other words, it's a lot like your face – it's the first impression that others get about you in most cases.

Your First Name may sometimes be used as a shield to protect you, or as a mask behind which to hide something going on within you; this shield, or mask, is like an “interface” that makes it easier to interact with others and which keeps simple aspects of social life from becoming “too complicated.”

The First Name is one of the primary choices made for you in life by others; whether or not you choose to use it as it was given to you is also a choice – it's all about what, and how, you choose to give of yourself to others, whether they happen to be close to you or merely members of the general public.

We've calculated the meaning of your First Name by calculating the reduced sum of the letters in your first name. Continue reading below for your personalized reading.

Your First Name Number

Shlomi, your First Name Number is 8

Because you have chosen to use a first name of the vibration Eight, Shlomi, it's likely that others will think you are stronger or more successful than you feel. You're probably going to experience situations in which others rely on your management skills and put you in positions that you don't really feel comfortable in - it's important that you don't make promises or commitments that you can't keep. Some people may see you as being materialistic, so if you're not, you need to be honest about it.

This First Name vibration can offer you some advantages, in that others will make it easy for you to take charge of situations, but don't be too quick to take on things unless you are confident that you can handle them properly. It would be a good idea to change your look when you transit from public to personal realms of activity, so that you don't carry this persona into your emotional/social support system. In other words, be yourself, but be aware that others may think you're being “bossy” when you have no such intention in mind.

THE MEANING OF YOUR MIDDLE NAME

Some Numerologists consider the Middle Name as the most important of the names that make up your Expression, or Total Name. This is because the Middle Name represents the inner you; it may reveal hidden talents, or it can involve the goals toward which you are striving or the path that your (usually unconscious) choices are leading you toward.

The Middle Name can help you to understand the desires or motivations which may sometimes puzzle you; it can explain not only why you have them, but can also tell you how to honor them in such a way that you increase your level of self-knowledge dramatically. It represents your inner place of refuge, not just in the sense of the ideas or thoughts that you are comfortable with, but the actions that resonate fully with your inner state of being. It can be a mode of expression for your inner guidance system and let you know if the path you are pursuing is the right one for you on all levels of existence.

Your Middle Name can also outline your weaknesses and make you aware of the areas in which you doubt yourself the most. Understanding these gives you a key with which you can unlock true inner healing and release your inner self, which achieves its purpose through its ability to express itself in the actions and activities you perform every day – from the smallest and seemingly least important to big decisions that can lead to life-changing experiences.

It's also important to realize that the inner self is not just the ego. There is a big difference between the conscious awareness of the mind and the inner being that you are in essence. Almost all spiritual teachings discuss letting go of the ego so that the true self can come through; learning to tune in to the true, inner self and its power is made easier by understanding the vibrational state of your Middle Name.

We've calculated the meaning of your Middle Name by calculating the reduced sum of the letters in your first and last name. Continue reading below for your personalized reading.

Your Middle Name Number

Shlomi, your Middle Name Number is 0.

Since you do not have a middle name, this section of the reading does not apply to you. Head over to the next section to continue reading your personalized numerology report.

THE MEANING OF YOUR LAST NAME

Your Last Name represents that part of you that is already present when you are born. It can be the point of origin for major life lessons, but what's most important is to realize is that it is directly related to the societal energy that lays the groundwork for your beliefs and the way you behave in society as an adult. This is similar to the function of the birth year vibration, sometimes called the Maturity Number, which comes into effect later in life.

If the Last Name you use has been changed through marriage or some other circumstance, it carries a special significance. If you adopt a name from outside of the family from which your genetic heritage originates, you also adopt the vibrational quality of that lineage. One way or another, though, your Last Name involves the history of your life that existed before you were born.

Your Last Name involves your relationship with your family. In some cases, where the Last Name is not directly related to the vibrational quality inherited from the male parent, it is related to the position in society that one holds. It also involves qualities which are passed on to the family that you build as an adult. What follows logically, then, is that your Last Name will relate by way of its Numerological value to important relationships that you develop with any relatives, and especially with your partner. That being said, the Last Name vibration is something you inherit by way of societal rules, and is not something that was chosen for you or that you chose yourself.

Your Last Name is thus clearly less important than your First Name, because it is not nearly as representative of your choices, but it should also be noted that many decisions are made due to the influence of one's parents or society's conventions. In some modern societies, in which there are fewer obligations to the family or the social group, it has barely any influence on one's choices at all. Nevertheless, it can still be of potentially great importance in terms of your relationship with the society in which you live, so it should never be excluded from a study of personal Numerology, where name analysis is of tremendous value.

We've calculated the meaning of your Last Name by calculating the reduced sum of the letters in your first and last name. Continue reading below for your personalized reading.

Your Last Name Number

Shlomi, your Last Name Number is 1.

Shlomi, your Last Name is of the vibration One, which means that you have inherited a force that is dynamic, initiating and creative, but can sometimes be overly impulsive. You may have been raised to be an opportunist, or adapted this kind of attitude from the surroundings you grew up in. You've probably noticed that you are quick to seize the advantage, but unless you think things through quickly, this behavior may get you in trouble. You may also attribute your goal-seeking orientation to your family history or background.

This vibration can be challenging because others will expect you to be more aggressive, while it is important for you to slow down and think things through. Any kind of meditation practice or mental training will benefit you immensely, because these practices make it much easier for you to let go of the expectations of others, or the social norms to which you may be attached. Plus, following this kind of discipline will activate your energetic guidance system in such a way that the momentum and force of your past or traditions will move in a direction that makes life less complicated.

You probably recognize this force in so many ways, but may not realize that without proving to be a "compassionate warrior" it can cause relationship issues due to hasty decisions.

Don't assume that the future is laid out for you, or that things will continue on as they have in the past. An important life lesson of this vibration is that you, not your heritage or culture, are responsible for your own experience in the present and the future. Once you begin to act on this basis, you'll be well on your way to creating your own destiny.

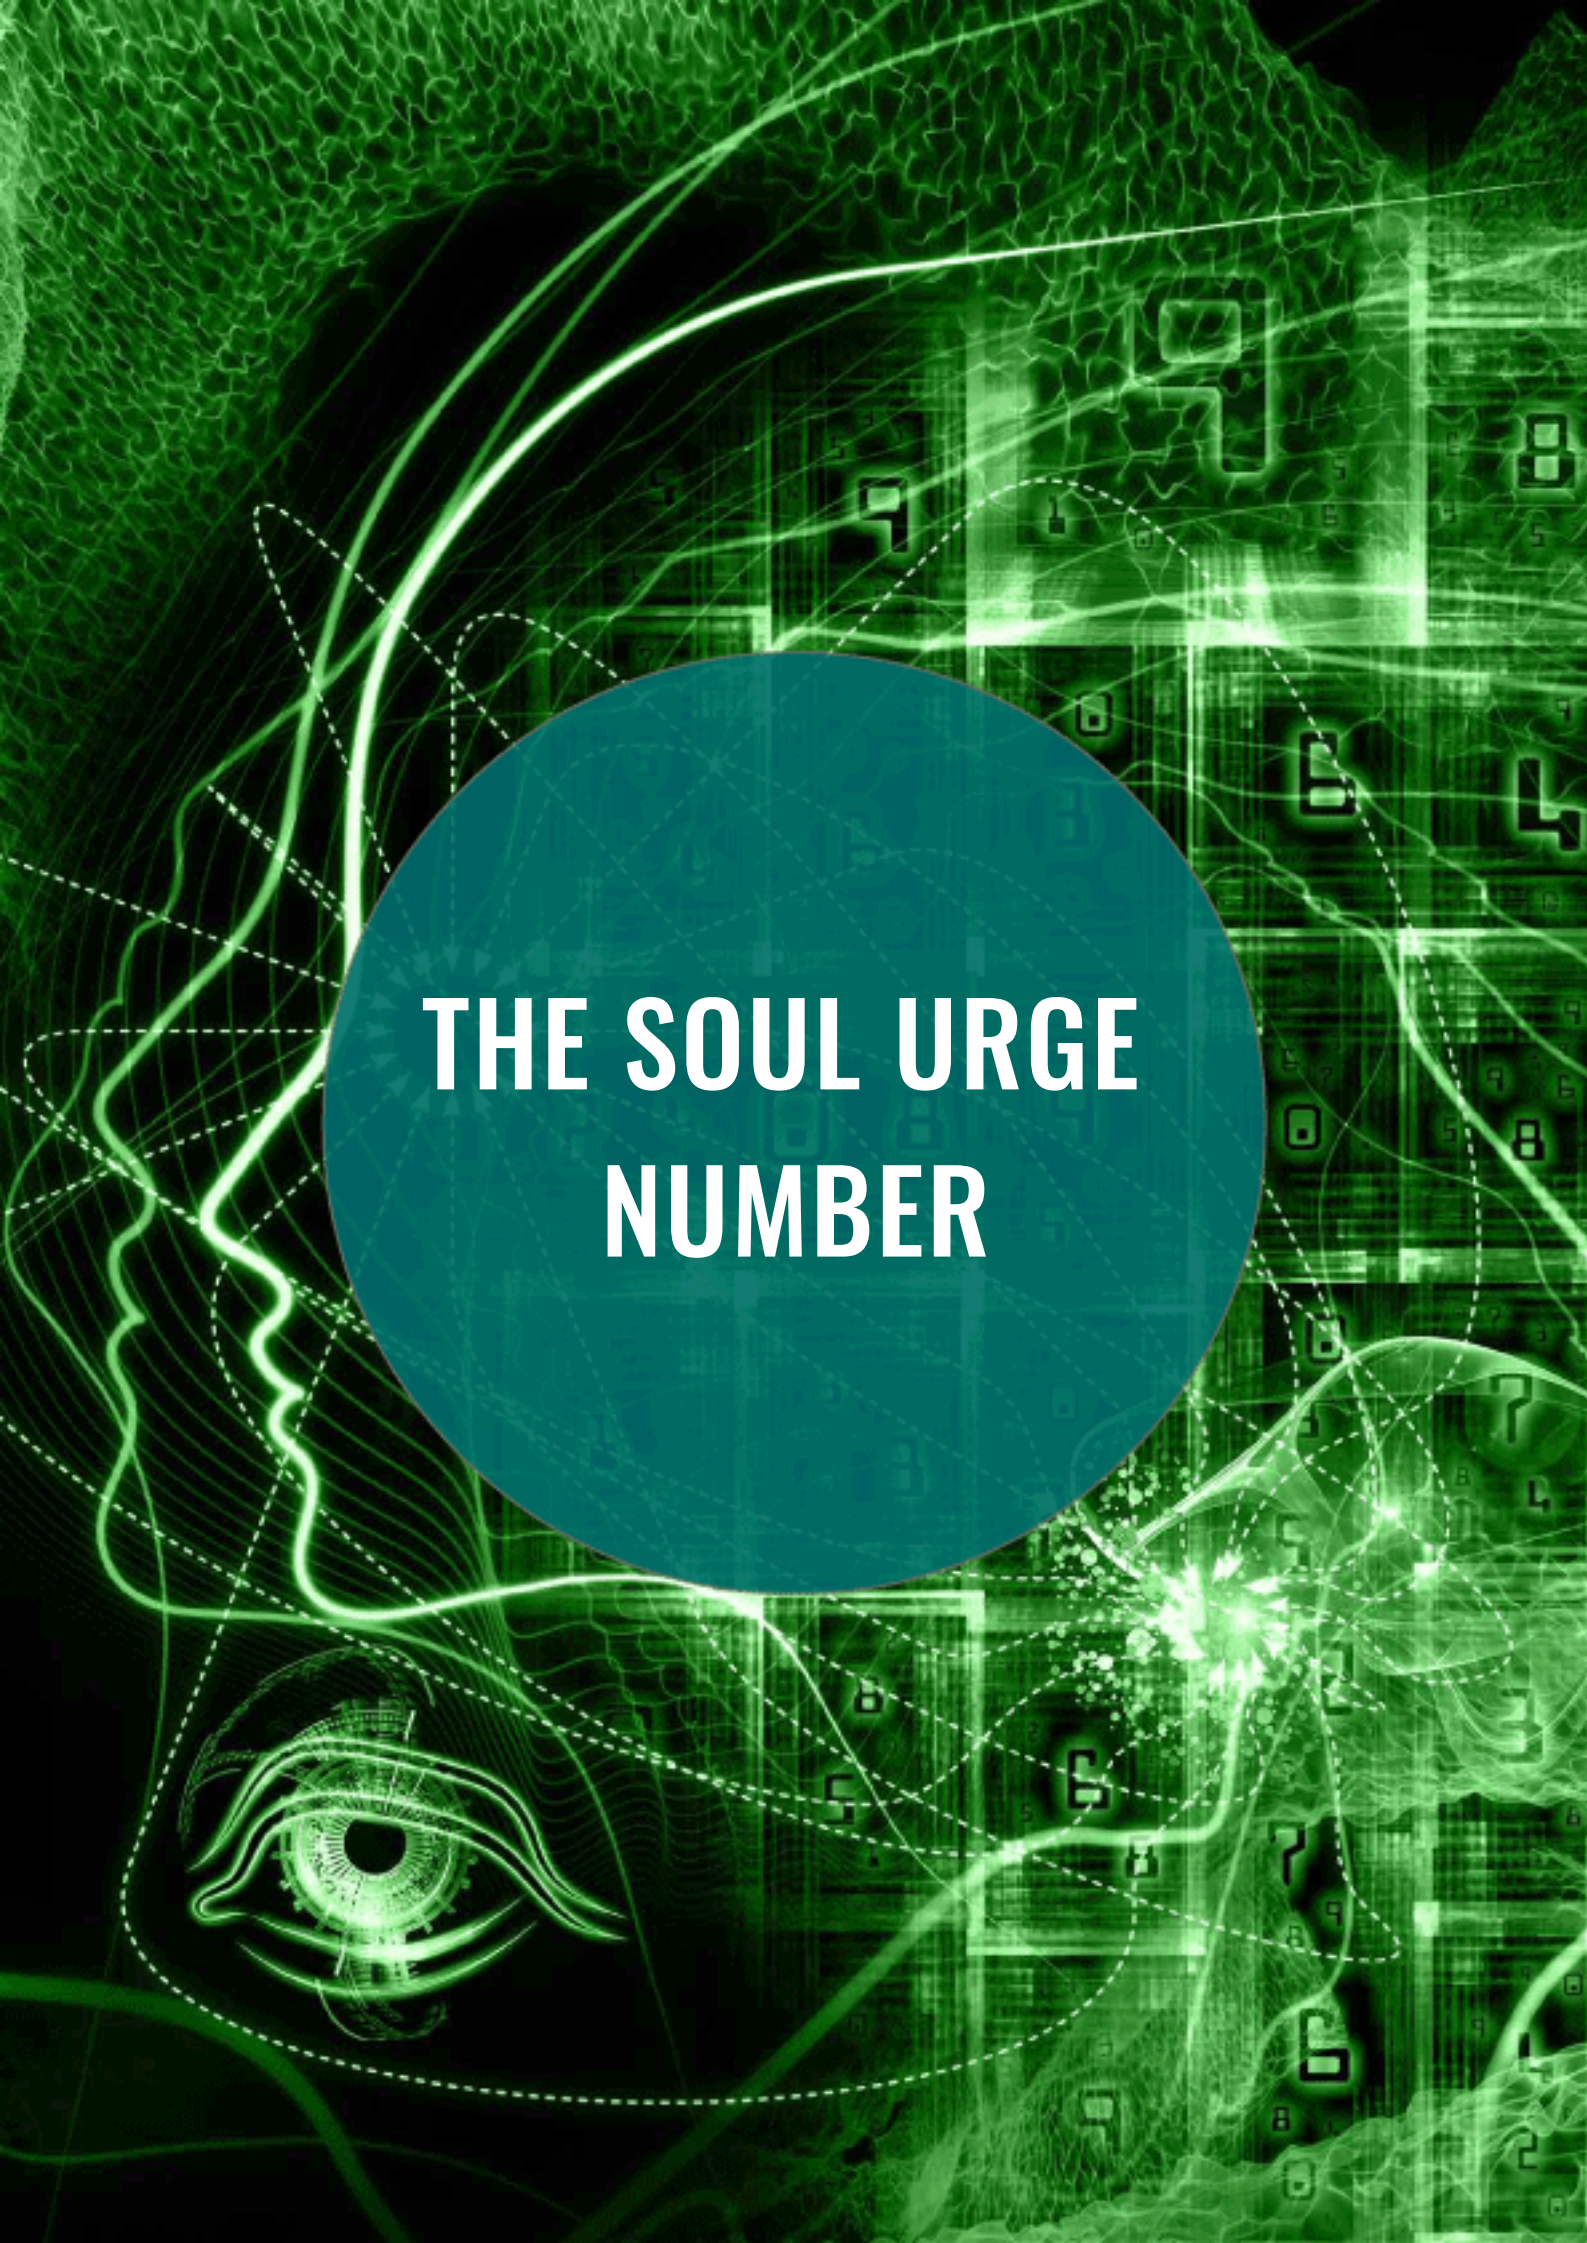

THE MEANING OF YOUR FULL NAME

You may not be aware of how much information you can acquire about yourself, or any other individual, merely from one's name. Your Full Name is an element in your Numerology Chart that can be explored in depth by identifying its arithmetic values and utilizing these as autonomous elements on their own. The categories which are based on this information are known by names such as the Soul Urge, the Personality or Quiet Self and the Expression. Almost all name-based analytical methods are derived from these.

Since the Expression is the same thing as your Full Name number, and is fully explored later in your report, we won't go into it in detail here. What we will do, however, is explore the basic factors of your name by examining the one you use in most settings - your Everyday Name.

Also, in order to provide you with some useful generalities for self-understanding, we'll explore the whole names that make up your full name — a very old and insightful method of arithmetic or numerological analysis.

The background is a vibrant green with a complex, abstract pattern. It features a grid of numbers (0-9) in a lighter shade of green, overlaid with a network of white dashed lines. A prominent, glowing white eye is positioned in the lower-left corner. A large, solid teal circle is centered on the page, containing the title text. The overall aesthetic is digital and energetic.

THE SOUL URGE NUMBER

THE SOUL URGE NUMBER: WHAT IT IS & HOW IT'S CALCULATED

The Soul is the essence of who we are. The Tibetans say that it is the subtle part of us that coordinates the five elements on all planes; the Greeks believed that it is a mixture of the material components of the world and the Nous, or spirit.

The Soul has an agenda; it is the part of us that seeks experience, expression and growth. Much has been written about how health, prosperity, love and fulfillment result from living the life of the Soul, and an equal amount has been said about what happens to us when we deny the Soul its expression.

Author, shaman, healer and teacher Robert Moss has said:

"When we pursue goals at the expense of our dreams and the urgings of the Soul, its participation in our lives may diminish or disappear. This can also happen when one experiences extreme pain, loss or other traumas; psychologists call this dissociation. 'Soul Loss' affects every aspect of our lives; our relationships, our work and our state of wellness."

Through Numerology, we have a way of glimpsing the urgings of the Soul by reading and honoring the Soul Urge Number, which is defined as the longing of the inner self. We may know what this longing is, but we may not end up expressing it, either by choice or because of our circumstances. That's why it's so important to know more about the Soul Urge; it becomes much easier to express it if you have guidelines that help you follow its lead.

The Soul Urge Number is also called "The Heart's Desire", and some Numerologists use it to understand your relationship style and the challenges you may experience in fulfilling your relationships. Either way, the art of honoring the Soul Urge/Heart's Desire is about achieving a sense of satisfaction and fulfillment in all aspects of life, and this is a goal worthy of all efforts one can make.

How It's Calculated

Your Soul Urge is derived from assigning numerical values to certain letters of your full birth name using the Pythagorean Alphabet. Specifically, to calculate your Soul Urge Number, you use only the vowels.

Vowels are pronounced from free-flowing breath and have soft edges. They represent the true, tender, and often hidden you and they reveal your deepest soul urges.

Interesting Fact: The famous Renaissance Doctor, translator and Astrologer, Marsilio Ficino, devoted much of his life to studying the incredible ways one's life improves when he or she follows the promptings of the soul. The benefits he encountered were undeniable.

The Pythagorean Alphabet:

1 = A, J, S

5 = E, N, W

9 = I, R

2 = B, K, T

6 = F, O, X

3 = C, L, U

7 = G, P, Y

4 = D, M, V

8 = H, Q, Z

Here is an example of how to calculate your Soul Urge Number using the Pythagorean Alphabet:

- Someone who was given the full name of James Frank Holmes at birth will have a Soul Urge Number of 9.
- To calculate, we look at the vowels in the name only.
- So, A, E, A, O, E.
- Next, using the Pythagorean Alphabet table above, we assign a numerical value to each letter.
- So, A = 1
- E = 5
- A = 1
- O = 6
- And, E = 5
- Next, we sum all of these digits together and reduce to a single digit.
- So, $1+5+1+6+5=18$, and $1+8=9$
- In this example, James has a Soul Urge of 9.

The Master Number Exception:

If your final calculation sums to total 11 or 22, there's no need to continue reducing. The calculation stops there. 11 and 22 are Master Numbers and they have a unique meaning that requires stand-alone readings.

For example:

- Johnny Depp has an 11 Soul Urge.
- He has only 2 vowels in his name, O and E.
- O = 6
- E = 5
- So, $6 + 5 = 11$

YOUR SOUL URGE NUMBER

Shlomi, your Soul Urge Number is 9.

Shlomi, your Soul Urge, or Heart's Desire, is of the vibration Nine, which usually describes a person as a seeker of knowledge. Most people probably recognize you as being appreciative and caring. It's likely that you often act on idealistic or altruistic motives, rather than logic. Chances are good that you want everyone to benefit from your knowledge and experience, and are willing to give your time and effort to improving others' lives, regardless of the cost to you. This Soul Urge vibration is also powerfully intuitive, and if you learn to act on your feelings and insights, this intuition will grow to be a tremendous asset to you throughout your life.

Whatever your spiritual beliefs are, it is very likely that you are motivated by compassion and altruism as you're the type of person who wants the best for everyone. There are times when you may be quite impersonal, surprising those who are used to your warm nature, because your Heart's Desire strives to feel and understand Universal Love. This inner motivation may not be obvious to you, because you may experience it when you are occupied with a project of some sort. During these times, you need to be sensitive to the feelings of friends, family or partners in order to avoid placing unintended stress on the relationship.

A strong moral sense compliments your innate compassion and when combined with your ability to tolerate difficult people, you may develop a reputation of having deep wisdom. If you do not direct energy into cultivating your inner wisdom, you could be victimized by those you want to help, and this could lead to a lack of faith, or even depression. Inner growth or self-development practices, such as meditation, can be of tremendous benefit to you.

YOUR SOUL URGE CHALLENGE

In a numerology chart, a challenge of any type is not considered the retribution of a vengeful universe, but rather a tool provided by nature to help you overcome personal weaknesses. Like other challenges in your chart, it is nature's way of giving us "bonus points" for doing something special that may be off the beaten track in terms of the patterns that emerge more readily from our many chart elements. No human being exists in a state of perfect balance, but is usually strong in some areas and weak in others.

H. H. Tenzin Gyatso, the XIV Dalai Lama of Tibet once said, "To be aware of a single shortcoming within oneself is more useful than to be aware of a thousand in somebody else." The challenge to the Soul Urge describes a special method you can use in order to reveal and work with these shortcomings, so that you can ultimately achieve the balance and fulfillment you seek.

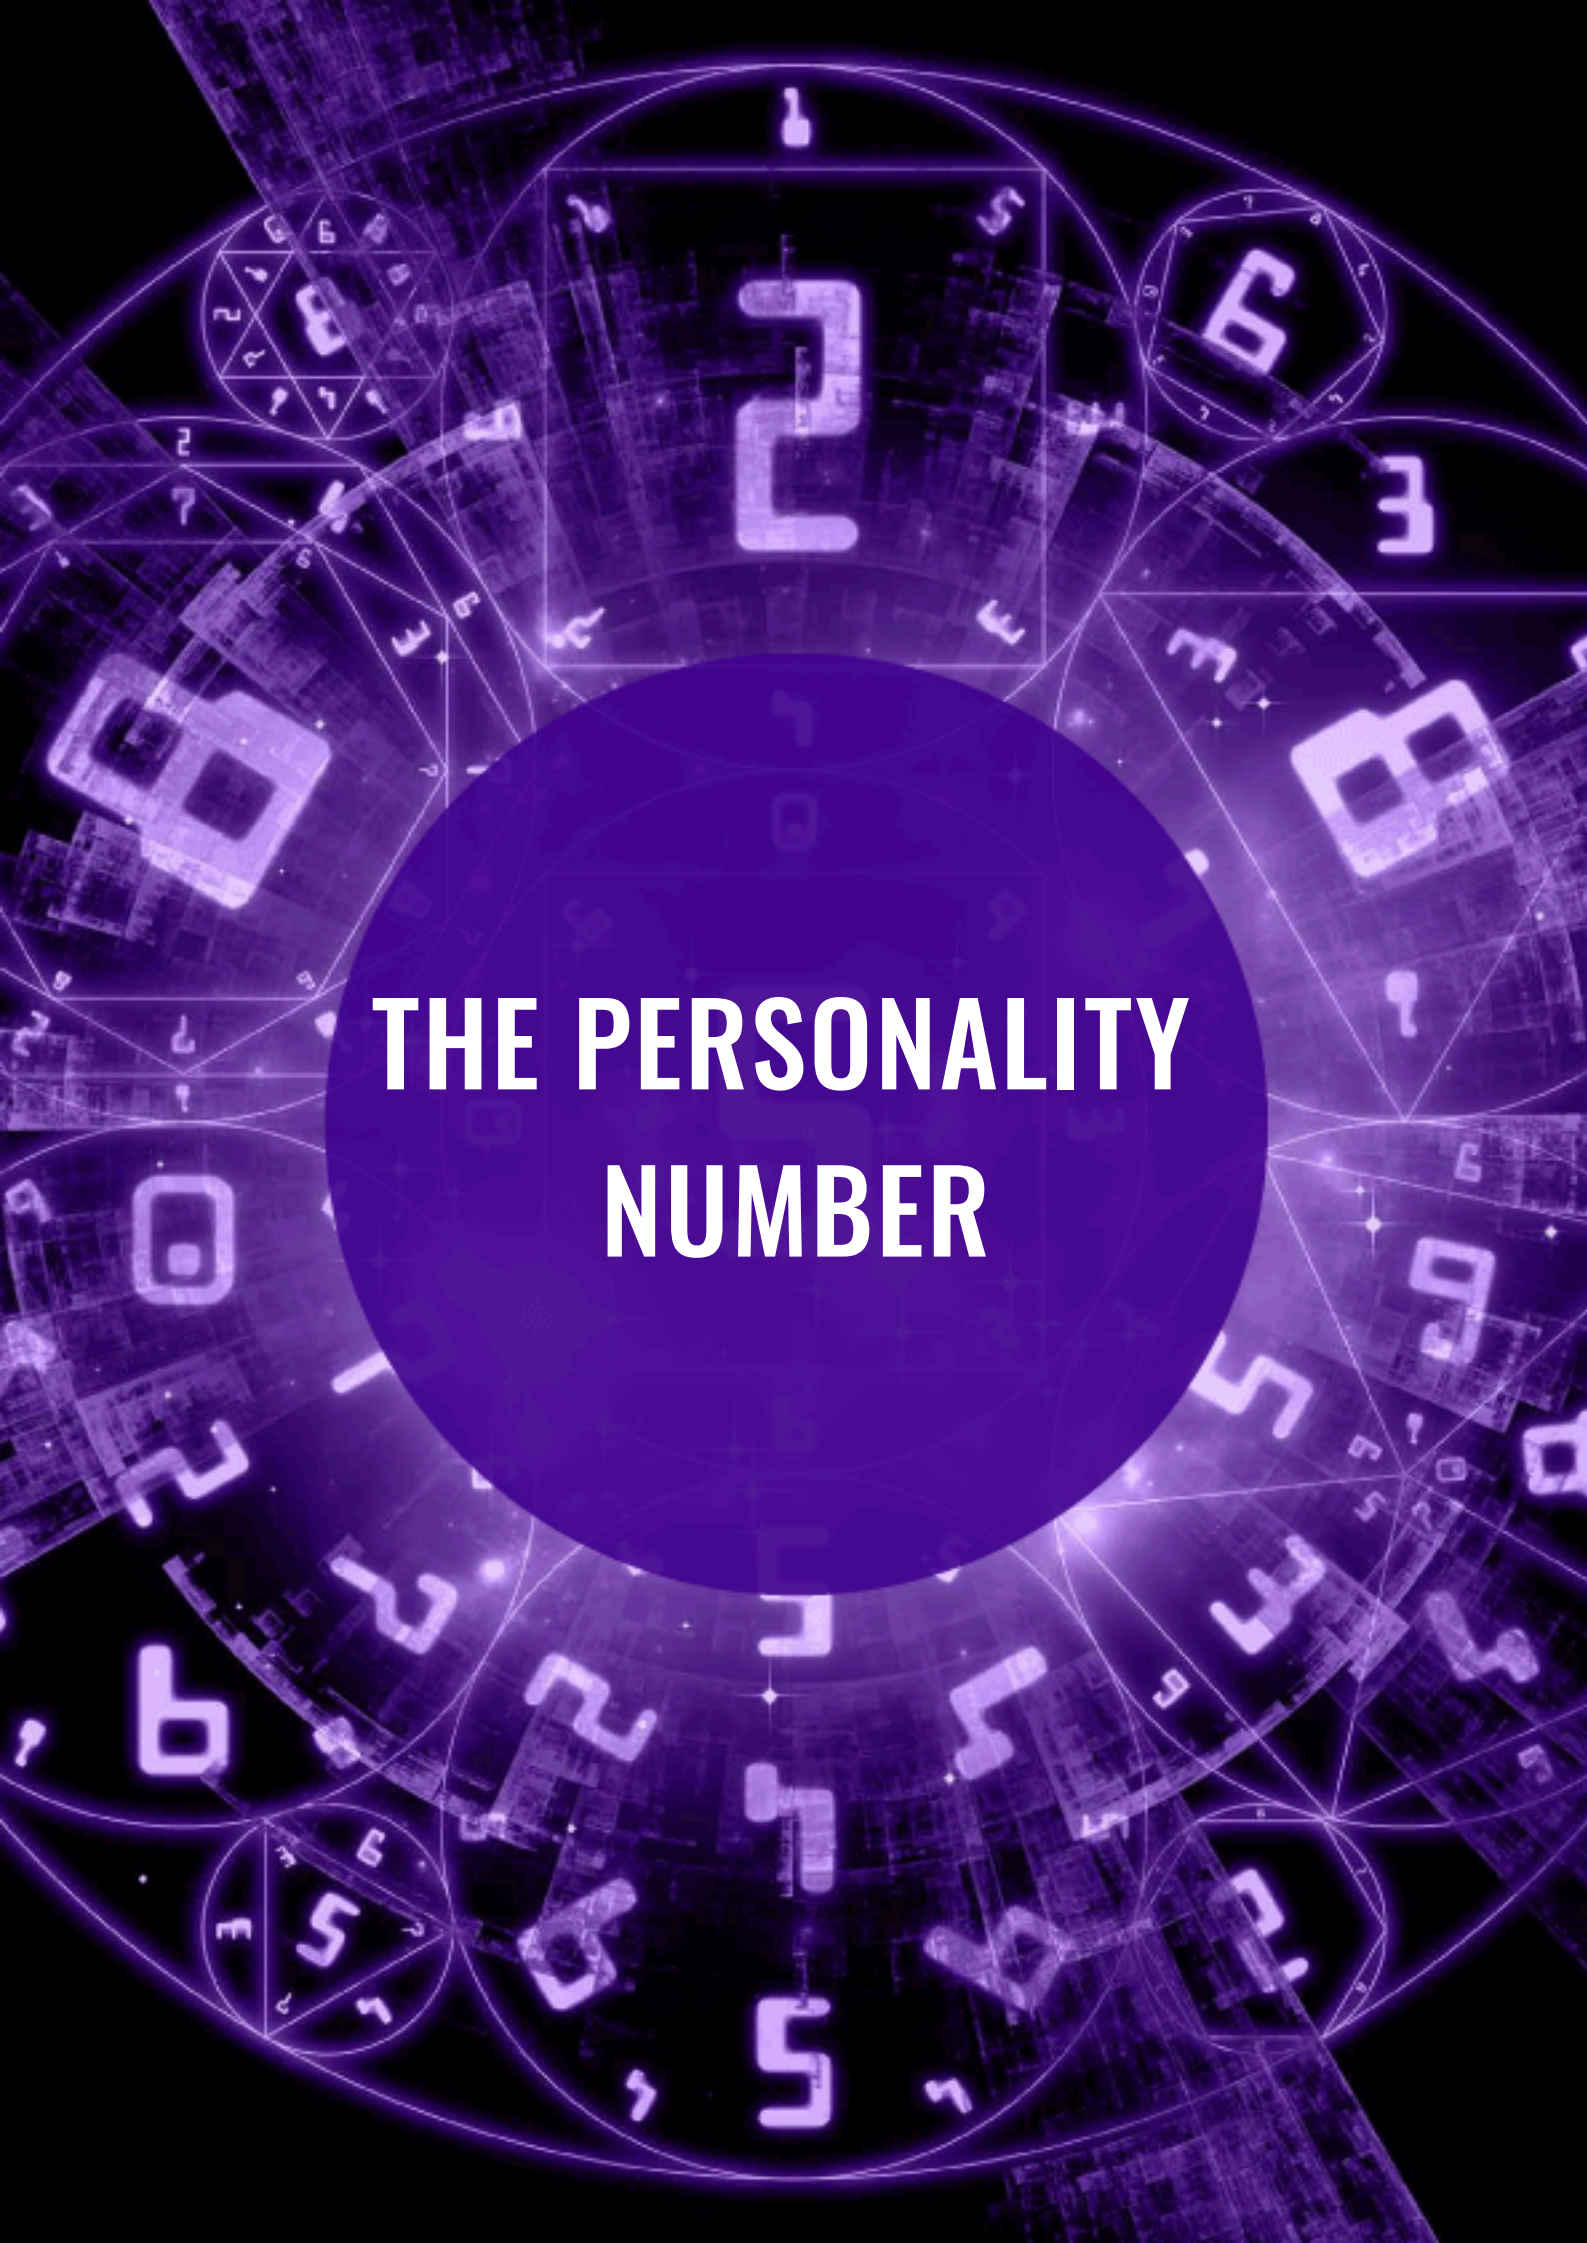

Your Soul Urge Challenge Number

Shlomi, your Soul Urge Challenge is 5.

Shlomi, your Soul Urge challenge is of the vibration Five. This challenge should be an easy one to take up, because you are likely to be willing to embrace and accept change when it comes to you. Your Soul Urge vibration has to do with finishing things or bringing them to completion – all you have to do is watch for the opportunity to do so.

Your experience in life thus far should give you a pretty good estimate of what this challenge is about. You'll have to work on three things; embracing change, overcoming inertia and being responsible with your freedom. Unless you are really entrenched in a comfort zone, you'll find that change brings opportunities hidden within it. If you are feeling stuck in a rut, all you have to do is realize that you've created a situation that is holding you back, and once you define it, let it go. Setting boundaries in social situations and sticking to them will break any irresponsible patterns. The gift of this challenge is a kind of freedom that allows you to work on feelings and hunches, because you will find guidance within you that harnesses the expression of your inner self to your advantage.

THE PERSONALITY NUMBER

THE PERSONALITY NUMBER: WHAT IT IS & HOW IT'S CALCULATED

The Personality Number, which some refer to as the Persona, is one of the two main factors derived from your full name. While the Soul Urge is calculated by summing the vowels, or the 'soul' of words, **the Personality Number is calculated by summing the consonants, which dictate how the soul of these words is manifested in the material world.**

In other words, the Persona compliments the inner aspect of the self. The consonants in any word help us make sense of the vowels by providing context; they give form (or in some cases, meaning) to the substance of the name, just as either spices or fire can contextualize, and thus give form, to the word "hot."

Many Indian Numerologists use the Personality Number as an indication of personal style, and along with it, the type of dress that works best for you, following the line of thought that "the first impression is the last impression" - they use it to define how your personal style and behavior affects others.

Some modern Numerologists refer to this as the "Quiet Self", and do not use it as an indicator of outward behavior, but as a clue to what you may dream of doing in the outer world. In reality, this vibration describes both how you imagine yourself and how you present your best self. On both conscious and unconscious (collective and personal) levels, it describes your learned behaviors and how you use them to express your essential self. One thing is certain: **your Personality Number is very important in the analysis of how present you are in the process of creating your destiny through your choices.**

Your Personality Number can tell you a lot about both those you meet as well as yourself, so it should not be ignored. As you progress in your journey into your personal Numerology chart, you'll find out just how useful the Persona vibration — and the tips you get from learning to understand it — can be.

How It's Calculated

Much like your Soul Urge and Expression Numbers, your Personality Number is derived from assigning numerical values to certain letters in your full birth name using the Pythagorean Alphabet. Except in this case, we use only the consonants.

Consonants are pronounced with sharp edges and have a definitive beginning or end. They represent your public personality and the traits you outwardly share with the world.

Here is an example of how to calculate your Personality Number using the Pythagorean Alphabet.

The Pythagorean Alphabet:

1 = A, J, S

5 = E, N, W

9 = I, R

2 = B, K, T

6 = F, O, X

3 = C, L, U

7 = G, P, Y

4 = D, M, V

8 = H, Q, Z

- Someone given the full name of Victoria Mae Smith at birth will have a Personality Number of 1.
- To calculate, we look at the consonants in the name only.
- So, V, C, T, R, M, S, M, T, H.
- Next, using the Pythagorean Alphabet table above, we assign a numerical value to each letter.
- So, V = 4
- C = 3
- T = 2
- R = 9
- M = 4
- S = 1
- M = 4
- T = 2
- And, H = 8
- Next, we sum all of these digits together and reduce to a single digit.
- So, $4+3+2+9+4+1+4+2+8=37$
- $3+7=10$
- And, $1+0=1$
- In this example, Victoria has a Personality Number of 1.

The Master Number Exception:

If your final calculation sums to total 11 or 22, there's no need to continue reducing. The calculation stops there. 11 and 22 are Master Numbers and they have a unique meaning that requires stand-alone readings.

For example:

- Albert Einstein has an 11 Personality.
- Let's look at the consonants only, L, B, R, T, N, S, T, N.
- L=3
- B=2
- R=9
- T=2
- N=5
- S=1
- T=2
- N=5
- So, $3+2+9+2+5+1+2+5=47$
- And, $4+7=11$

YOUR PERSONALITY NUMBER

Shlomi, your Personality Number is 9.

Shlomi, your Personality Number, or Persona, holds the value of the Numerological vibration "Nine." Chances are good that you look younger than your age, and take advantage of it when you are out to impress someone. There is a type of friendliness to this vibration that causes people to think that you are there to help, or fulfill an expectation of theirs, especially when you are in your most casual or practical mood. According to many numerologists, you should avoid wearing black as a main color. You also tend to be generous with your knowledge time and resources, so avoid being too willing to give your time away to those who don't deserve it.

YOUR PERSONALITY CHALLENGE NUMBER

As mentioned earlier, some writings on the subject of Numerology treat the Personality Number (Persona) as associated only with visible aspects of the self, while others treat it as a hidden yet driving aspect of the personality, referring to it as the Quiet Self. But both of these views of the Persona and what its Challenge means are superficial at best.

Anyone's thoughts and attitude about the self affect health, prosperity, relationships, and all other matters connected with our well-being. Your Persona is derived from experience, which is the feedback the universe gives us about our choices, thoughts, words and deeds. When you are unhappy with your circumstances, it is the Persona that interprets how the Soul perceives them and integrates this perception into the conscious mind - it may generate a constructive action plan in line with its Numerological value, or it may generate angry, self-critical, defensive or defeatist thoughts and attitudes.

These thoughts and emotions may sabotage your plans or slow their momentum; if no plans have been made, they may suppress the psychic energy generated by your inner self, which can result in disturbances to your well-being, both in body and mind.

It should be mentioned again that in Numerology, a Challenge is not a threat. The Challenges in Numerology, especially those derived from your name, are about choices available to you that can improve your overall circumstances.

Your Personality Challenge Number

Shlomi, your Personality Challenge Number is 4.

Shlomi, because you have a Personality Challenge of the vibration Four, it may be very easy for you to feel oppressed by the tasks you take on. Your desire to be helpful could lead you into situations where others expectations of you become truly unrealistic, in which case you'll find that you're constantly trying to keep up with their demands, rather than fulfilling your own basic emotional needs. The antidote for this challenge is to act in a systematic and orderly fashion, manage your time well and pay attention to the small details – remaining focused on the big picture comes naturally for you, so pay attention to the small things. Try to avoid volunteering, unless it is very limited in time and doesn't cause you to go out of your way to do so.

The background is a dark, textured surface with a faint hexagonal grid. A large, solid yellow circle is centered in the frame. Surrounding this circle are several concentric circles and radial lines, creating a sunburst or ripple effect. The lines are yellow and black, radiating from the center. At the top and bottom of the image, there are two small yellow circles, each with a larger yellow circle above and below it, respectively. The overall composition is symmetrical and geometric.

THE EXPRESSION NUMBER

THE EXPRESSION NUMBER: WHAT IT IS & HOW IT'S CALCULATED

The Expression, or Total Name Number, describes the magic that you bring into the world; it is the number that provides an overview of what you send out into your surroundings. People don't usually realize that they create chains of cause and effect through their actions which open the door to new experiences. Essentially, everyone is constantly shaping the future in their own way.

Learning about your Expression and its challenge gives you the opportunity to make adjustments in your actions through which you can engineer a future that is more in line with your gifts and talents, and which you can therefore share with others.

One reason that the Expression is such an important part of your chart is that it represents your power of choice. Even though your name was given to you, this was a choice on someone's part, one which transferred to you this wonderful human power. This ability to choose may not always be a blessing, however, because every vibration has its upside and downside. No one makes perfectly correct decisions all the time, and it takes a great deal of understanding and self-knowledge to tune your decisions and actions to move in the direction that best suits you and reflects the most favorable qualities of your Expression Number.

Unlike the Life Path Number, the Expression is not permanent. **It can be changed, thereby altering the quality of your choices.** Even though it is possible to change your name to enhance or suppress certain aspects of your character (and therefore your lifestyle), this has to be done very carefully - many facets of one's Numerology chart must be thoroughly examined in order to make sure that you are not fixing one thing but breaking another.

A famous teacher once said: *"What you send out into the world is what you get back."* This is a perfect description of the Expression, and also why some refer to it as the Destiny Number.

How It's Calculated

Your Expression Number is calculated much like your Soul Urge, by assigning numerical values to the letters in your name using the Pythagorean Alphabet. Except in this case, we use ALL the letters in your name because each letter, and its corresponding number and vibration, combine to form the complete picture of who you are and how you express yourself.

Here is an example of how to calculate your Expression Number using the Pythagorean Alphabet.

The Pythagorean Alphabet:

1 = A, J, S

5 = E, N, W

9 = I, R

2 = B, K, T

6 = F, O, X

3 = C, L, U

7 = G, P, Y

4 = D, M, V

8 = H, Q, Z

- Someone given the full name of Kathy Anne Franklin at birth, will have an Expression Number of 4.
- We'll start by assigning a numerical value to every letter using the Pythagorean Alphabet table above.

- So, K = 2

- N = 5

- N = 5

- A = 1

- N = 5

- K = 2

- T = 2

- E = 5

- L = 3

- H = 8

- F = 6

- I = 9

- Y = 7

- R = 9

- And, N = 5

- A = 1

- A = 1

- Next, we sum all of these digits together and reduce to a single digit.

- So, $2+1+2+8+7+1+5+5+5+6+9+1+5+2+3+9+5=76$

- $7+6=13$

- And, $1+3=4$

- In this example, Kathy has an Expression Number of 4.

The Master Number Exception:

If your final calculation sums to total 11 or 22, there's no need to continue reducing. The calculation stops there. 11 and 22 are Master Numbers and they have a unique meaning that requires stand-alone readings.

For example:

- Kim Kardashian has an 11 Expression.
- K=2
- I=9
- M=4
- K=2
- A=1
- R=9
- D=4
- A=1
- S=1
- H=8
- I=9
- A=1
- N=5
- So, $2+9+4+2+1+9+4+1+1+8+9+1+5=56$
- And, $5+6=11$

YOUR EXPRESSION NUMBER

Shlomi, your Expression Number is 9.

Shlomi, your Expression, or Destiny Number is Nine. Nine is known for its quiet power and intensity, which attracts many people to you, making it a very favorable vibration for those who deliver information to others. It is a very creative vibration; doing things in an original or unique way is one of your hallmarks.

You have the kind of temperament that rarely backs down from a challenge. It's possible that you aren't aware of your amazing power of recovery that acts on both the physical and emotional levels; many things you have encountered would have completely devastated others, but you manage to bounce back quickly. This is not to say that you're emotionally numb, however, for Nine is known for its sensitivity and romanticism.

The difficulties that you face show up when you focus your time and effort on achieving material goals. At the same time, when you pursue philosophic or spiritual goals, you find that wonderful things happen without any effort on your part.

This focus on what you're trying to achieve is important because the negative path of Expression Nine can start from being overly concerned with status, and using any means necessary to achieve goals. On this path, small problems become more severe, and eventually grow into overwhelming complications. The arrogance, selfishness and self-righteousness that can come from this path may turn potential allies and supporters into enemies.

Your talent for seeing the big picture needs to be turned inward so that you can occasionally ask yourself "where am I going with this?" – the answer may be very surprising, and help you tune your intuition, which will never steer you wrong, unless you are trying to use it to take advantage of others.

You have a very strong independent streak, and would rather direct than be directed. It is very important that you cultivate compassion and do some form of charitable or humanitarian work - not sitting around and talking about politics, but helping people in achieve something they could not do without your aid.

YOUR EXPRESSION CHALLENGE

Like other major elements of your Numerology chart, the Expression provides its own challenge. It's actually the numerological or arithmetic sum of the Soul Urge and Personality Number challenges. This does not mean, however, that it can be described by combining the two challenges. The Expression Challenge is synergetic - which means that it is a whole vibration that is greater than the sum of its parts.

The Expression Challenge is thus distinct from its two component challenges, and has a unique meaning. You can work with this challenge without affecting the Soul Urge or the Personal challenges, or you can work with all of them at once. It is often recommended to work with the Expression first, because it has a larger overall effect on one's life - people are usually able to learn more about the real you by using the Expression than by using its separate components.

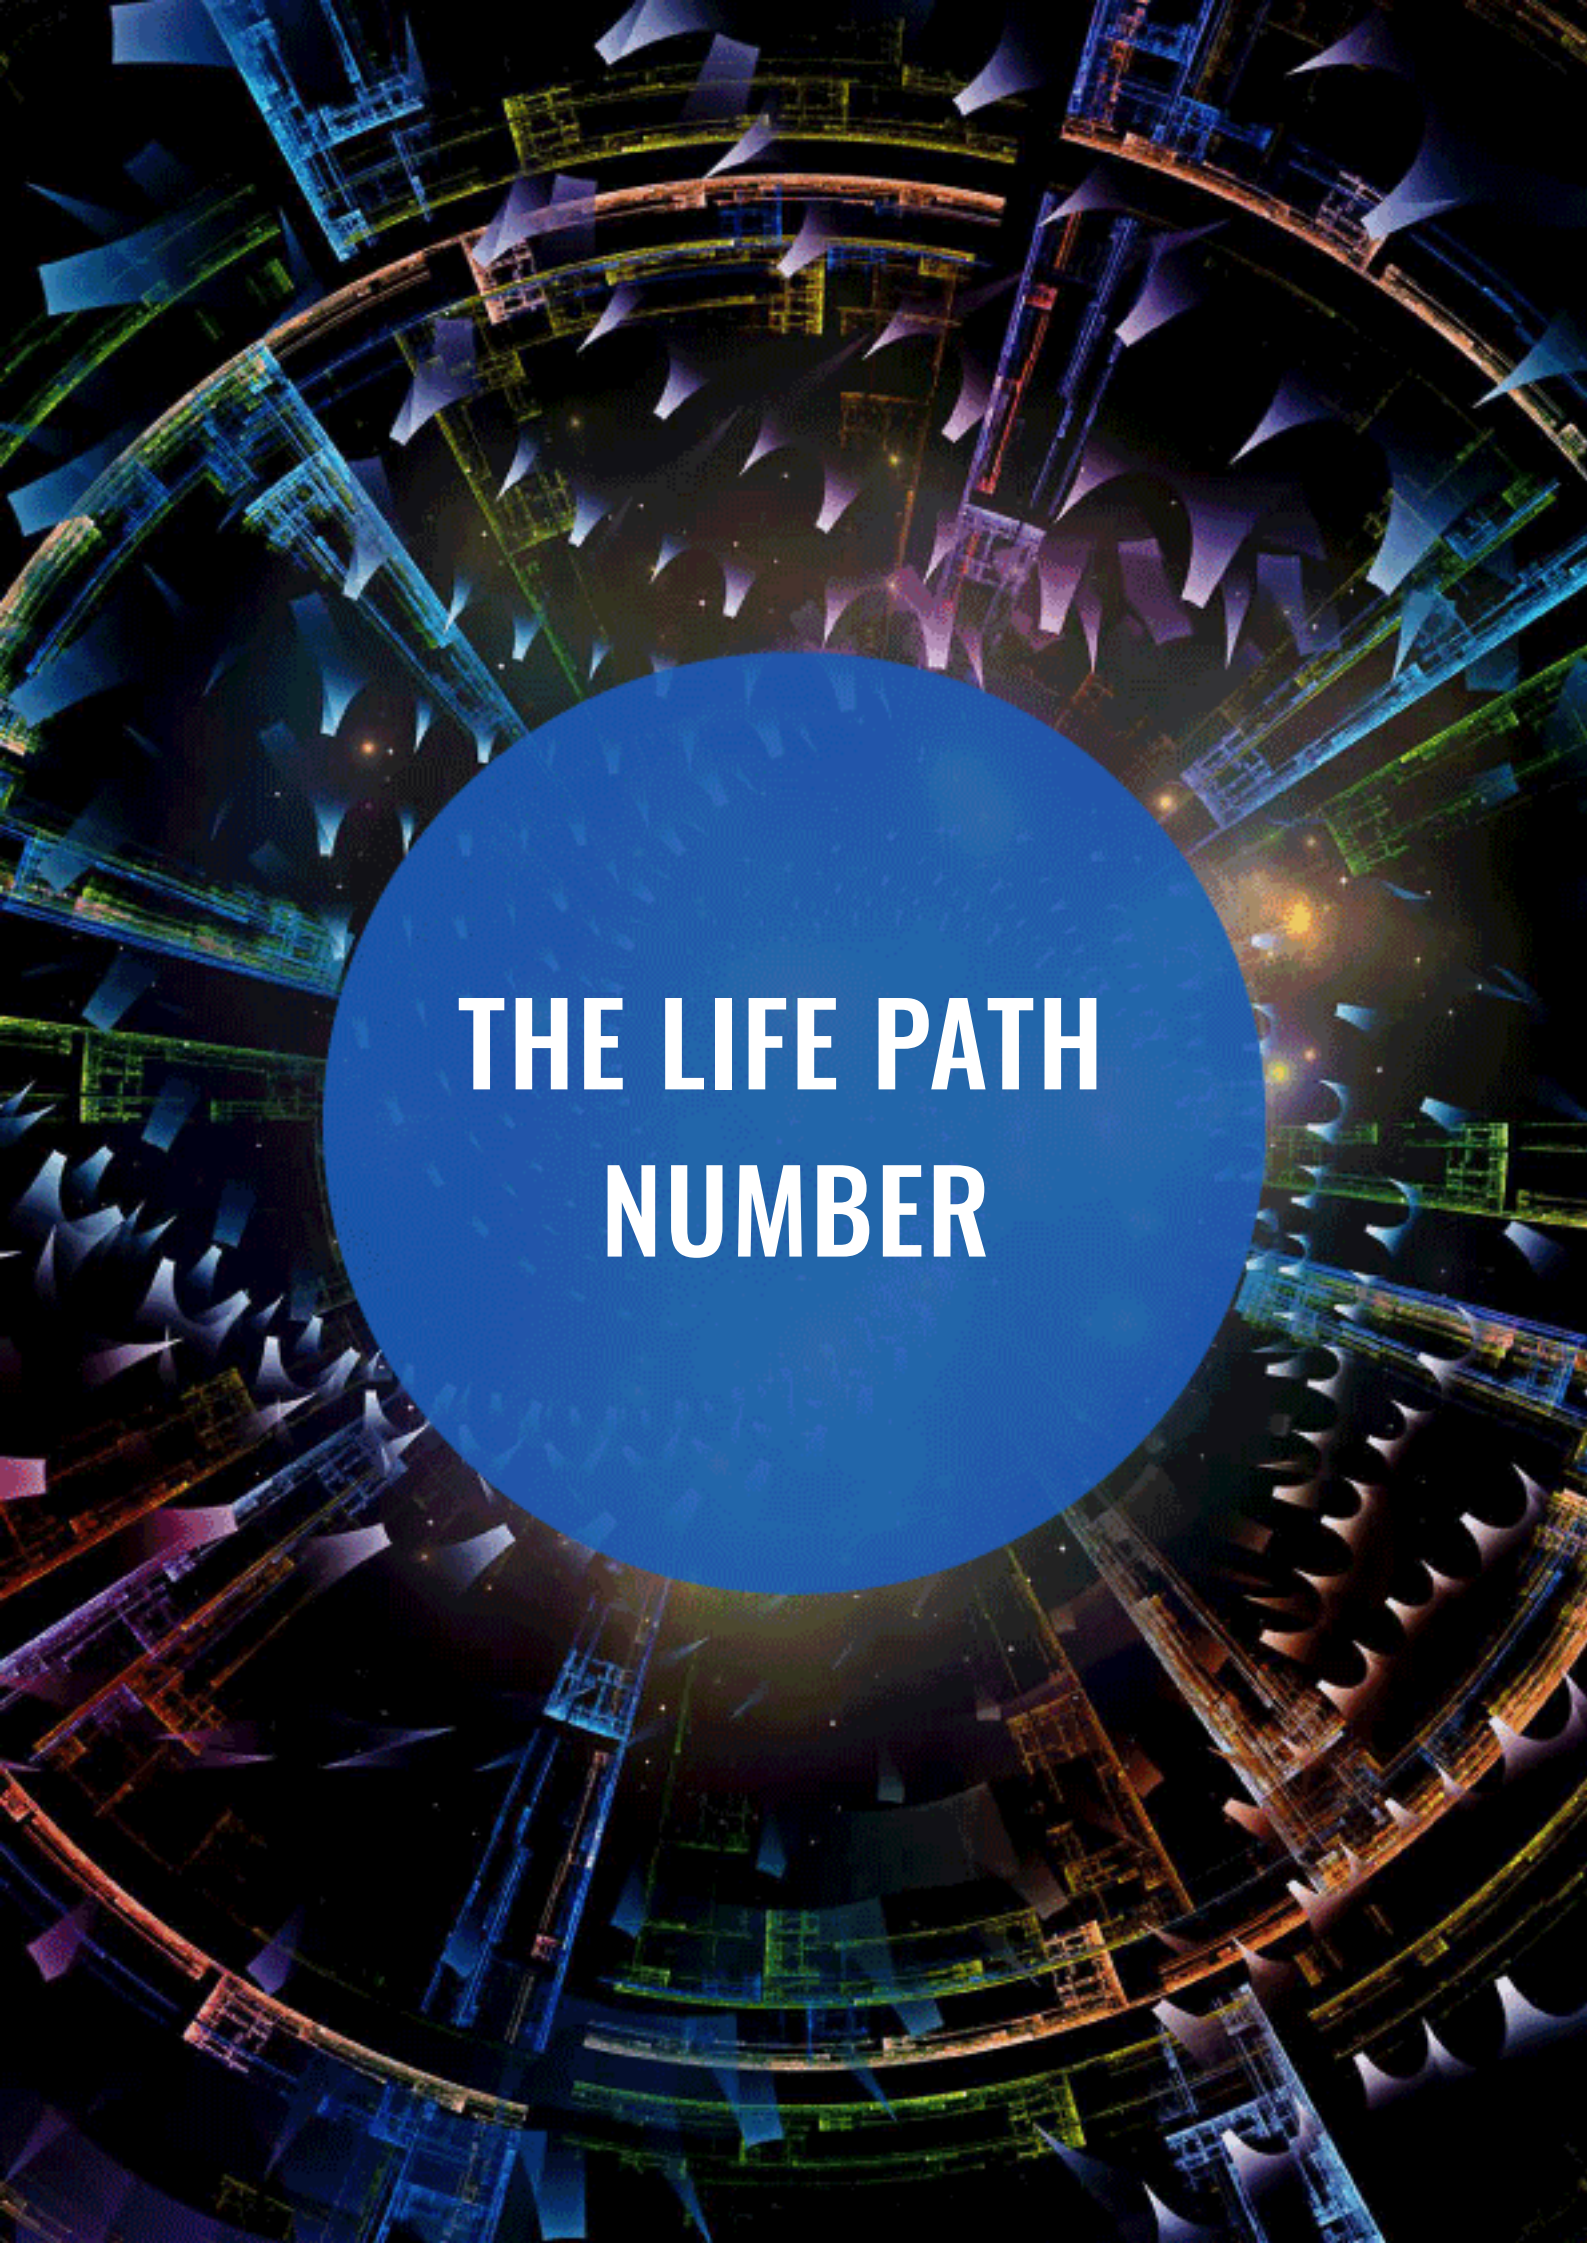

Once again, a challenge in Numerology is not some kind of counter-force that works against your happiness, success or well-being. It is rather a way of gaining "extra credit" or "bonus points" in the game of life, and in so doing you can accelerate the learning which you are here to accomplish.

Your Expression Challenge Number

Shlomi, your Expression Challenge Number is 9.

Shlomi, your Expression Challenge is described by vibration Nine. It's especially important that you attend to working with your Expression Challenge, because it holds the same vibration as your Expression number itself. This challenge Nine is made up of parts of all the others, and requires a multi-pronged strategy to master. You'll need to be on guard against being too aggressive or too submissive in order to master challenges 1 and 2. Enjoying a social life while taking care of the practical details of your own affairs will handle vibrations 3 and 4. Learning to accept the changes that life brings, while avoiding efforts to "fix" situations or people that don't meet with your expectations conquers 5 and 6. Avoiding isolation while cultivating a balanced attitude about money handles 7 and 8. Make a checklist of these ideas and work with them. You'll be amazed at the results.

THE LIFE PATH NUMBER

THE LIFE PATH NUMBER: WHAT IT IS & HOW IT'S CALCULATED

There are many factors and calculations that make up a complete Numerology report or forecast, but of all the elements in your chart, one stands alone when it comes to describing your cumulative circumstances throughout life.

This element is your Life Path, sometimes also called the Birth Path or the Destiny Number. **It represents the situations and opportunities that you attract as the result of your actions,** and thus the landscape of the world through which you navigate. It is a central number, or core element, in the hierarchy of vibrations that make up your Numerology chart, and is used in almost every school of Numerology known to exist.

Your Life Path Number is found by adding together the month and day of birth, adding them to the year, and then finding the final arithmetic sum. This number is so important because one's date of birth cannot be changed; in the Eastern world it is often said to represent "non-negotiable Karma."

The physical and psychic environment leading up to your birth (and for some time after) is also part of the unchangeable aspect of your present experiences. The seed determines the type of tree: although the tree can be trimmed or altered in other ways, its basic type cannot be changed.

Most forecasting cycles and time periods are established by examining the Life Path components as well. **The timing of the unique event of your birth, when examined through the lens of Numerology, gives us the key to unlocking the essential patterns that present themselves to you throughout your life experience.**

How It's Calculated

Your Life Path Number is calculated by reducing the sum of your entire date of birth to a single digit.

You start by reducing your month of birth, your day of birth, and your year of birth to a single digit. You then add those 3 numbers together and reduce the sum to a single digit to get your final Life Path Number.

The Pythagorean Alphabet:

1 = A, J, S

2 = B, K, T

3 = C, L, U

4 = D, M, V

5 = E, N, W

6 = F, O, X

7 = G, P, Y

8 = H, Q, Z

9 = I, R

Here's an example:

- Someone born December 15, 1987 will have a Life Path of 7.
- We start by reducing the month of birth to a single digit. December is the 12th month of the year.
- So, $1+2=3$
- We then reduce the day of birth, the 15th, to a single digit.
- So, $1+5=6$
- Next, we reduce the year of birth, 1987, to a single digit.
- So, $1+9+8+7=25$, and $2+5=7$
- Last, we add these 3 numbers together and reduce to a single digit to find the Life Path Number.
- So, $3+6+7=16$, and $1+6=7$
- In this example, the Life Path Number is 7.

The Master Number Exception:

If your final calculation sums to total 11 or 22, there's no need to continue reducing. The calculation stops there. 11 and 22 are Master Numbers and they have a unique meaning that requires stand-alone readings.

For example:

- Someone born on May 10, 1985 will have a Life Path Number of 11.
- May is the 5th month of the year and does not need to be reduced further.
- Then we reduce the day of birth, the 10th, to a single digit.
- So, $1+0=1$
- Next, we reduce the year of birth, 1985, to a single digit.
- So, $1+9+8+5=23$, and $2+3=5$
- Last, we add these 3 numbers together to find the Life Path Number.
- So, $5+1+5=11$, we do not reduce further.
- In this example, the Life Path Number is an 11.

YOUR LIFE PATH NUMBER

Shlomi, your Life Path Number is 6.

Shlomi your Life Path is of the vibration Six. This means that your love of duty and willingness to sacrifice will bring happiness in professional or domestic life. Your natural sense of responsibility, coupled with your great capacity for love may be the basis of your ability to give your all for the cause or the happiness of those you care about.

Some Numerologists call this vibration the “Path of Adjustments”, in that you will spend much of your time settling disputes, negotiating solutions or making final decisions. This vibration also helps you to adapt to whatever changes of circumstance you may face during life.

Your devotion to duty may cause you to take on many difficult and maybe even dangerous responsibilities in life. You also have a strong desire to be of service, which may help you to be able to find work and business opportunities easily. Even though you're not likely to be one who minds starting from the bottom and working your way up, but chances are good that your rise to the top won't take that long.

You're not a natural at doing the hard physical tasks necessary to get things done, Shlomi, but you're willing to do them if you have to; it's much easier for you to apply your intelligence, creativity, sympathetic nature and balanced judgment to make the right moves.

You may find that your ability to throw yourself completely into your work is actually the key to your success. Many people of this Life Path are involved in healing, wellness or counseling, but regardless of your career path, you'll find that people will seek you out for both advice and support.

Because the theme of balance and service are so strong in this vibration, the negative attributes are very powerful as well. You can easily throw yourself so fully into a cause or agenda that you might neglect those who care about you the most. Living at a point of balance, (Six is the balance point of the Fadic and Master Numbers, i.e. 1, 2, 3, 4, 5 – 6 – 7, 8, 9, 11, 22) it may be all too easy for you to focus on the extreme, for good or ill. It's really important that you look at things and people for what or who they are, rather than looking for perfection in everything, or judging the world by your personal standards.

People of your vibrational type get along much better in life when in a committed partnership. Because of the predilection towards responsibility and tendency to enjoy obligations, the various aspects of maintaining a home or family do a good job of balancing this energy. Sometimes, however, your sympathies toward others and willingness to help may take time away from your primary relationship, and this can cause problems.

Relatives and friends generally consider you to be dependable, and will often rely on your devotion to them. You may find yourself, at some point in life, denying yourself happiness because of loyalties to family. But you have so much love to give that it will not be denied, and even if relationships are trying during your early years, your dutiful nature and service to others will be rewarded later.

Spirituality comes naturally to you, Shlomi, because of your natural capacity for duty, loyalty and service. You are quite practical in these matters, preferring paths based on service to humanity rather than those that are based on personal transcendence. When following a path that involves deeply personal activities such as meditation or individual retreats, you may end up in a position of authority because you will naturally want to help others in the way that your chosen path has helped you.

THE LIFE PATH CHALLENGES

YOUR LIFE PATH CHALLENGES

The Life Path number is made up of the vibrations of the month, day and year of birth. These three vibrations define the major stages along the Life Path, and help us understand how we change over time. One of the ways it helps us to navigate the tides of change we all face is to offer us Life Challenges. These Challenges will increase and decrease in prominence at different times in life, but that's not a bad thing.

Challenges in Numerology are not contentious; the old tradition described them as though they were harsh lessons we have to learn. In modern times, we have discovered that this is not so. The various types of Challenges that we have are more like "extra credit" questions on a test, or a make-up exam which can stand in for one you missed. If you are able to attain the best possible expression of your vibration, it will empower other aspects of your chart, so that together they can attract or express the best qualities of your vibration.

Sometimes the Challenges might offer one or more of those "now why did I do that?" moments. When they do, it's a signal that you've allowed yourself to go off course a bit - they are offering you the opportunity to take the "high road" inherent in their vibrations. If we ignore them altogether, then the "low road" of the Challenges will manifest as persistent issues related to their vibration and will bring out the less positive qualities of the key elements in your chart.

There are three Life Challenges in your Numerology chart: the first and second Minor Challenges and the Major Challenge. The first Minor Challenge is felt more strongly during your early years, and the second Minor Challenge will manifest more in later life. The Major Challenge is experienced throughout your lifetime.

So when you are considering what you can do to improve your situation, need a quick and effective strategy for handling an issue that has presented itself, or feel as if you are off-track when it comes to attracting positive experiences, study this section of your chart and think about how to meet your Challenges - the extra credit you accumulate will increase your total score!

YOUR FIRST MINOR CHALLENGE

The first Minor Challenge, as stated earlier, is active during your early years. These early years generally run through the mid 30's and sometimes into the 40's. The Challenges are established by locating the numbers along your Life Path which connect its various components — they thus interact with the individual vibrations of the Life Path Cycles, and provide us the opportunity of resonating with a vibration that affects more than one of them simultaneously.

If we can successfully make use of this element, mastering the quality of the first Minor Challenge allows us to link the Formative and Productive Cycles, which can help us use the experiences of our early lives to make the most out of the circumstances which arise during our Cycle of Productivity.

Your First Minor Challenge Number

Shlomi, your First Minor Challenge Number is 4.

Shlomi, your First Minor Challenge is of the vibration 4. Four is often written of as the number of work, but when it comes to this particular Challenge, it may apply to a number of things. It is a vibration that speaks of the “bottom line” in life; matters concerning work and health are its primary concerns. The first way is that it may attract situations that take your attention away from practical matters and their details, in which case you may need to apply yourself more to attending to these aspects of life. In the second case it can attract vibrations that make these practical affairs exciting, resulting in your being overly concerned about them. The “extra credit” comes from being practical about these matters, and learn to approach them in a balanced, matter of fact way, and you'll find them to bring only good into your life.

YOUR SECOND MINOR CHALLENGE

The Second Minor Challenge picks up during midlife and continues until your later years. This Challenge links the Formative Cycle to the Harvest Cycle, effectively blending youthful enthusiasm with the wisdom of one's later years. It forms a balance between innocence and maturity, helping us to avoid the kinds of mistakes we all make before we gain enough experience to recognize our vulnerabilities and learn how to balance them.

When we work with this Challenge, we are able to attain a level of experiential knowledge without losing our joie de vivre; we become able to make sober decisions without losing our sense of humor. But like every vibration in your chart, this too matches the quality of your consciousness. If you are open to the possibility of gaining the "extra credit" of this Challenge, the positive side of its vibration will continue throughout your life; conversely, if the opportunity to use it is ignored, the latter half of life will be more difficult to navigate.

Your Second Minor Challenge Number

Shlomi, your Second Minor Challenge Number is 1.

Shlomi, your Second Minor Challenge carries the vibration 1. One can be very individualistic and active, and sometimes forceful. During the latter half of life, you'll attract opportunities be very busy, maybe taking on a leadership role, but it's up to you whether or not you accept it. If you want the "extra credit" this challenge offers, don't try to take advantage of others or force them to do as you tell them. On the other hand, it's important that you don't give up on your plans and goals. Whatever you encounter in any phase of life you need to approach with enthusiasm if you want to recover your drive and persistence. You probably will not want to simply do as others tell you, but you don't have to be confrontational when negotiation is at all possible. Because of the nature of the Challenge, you need to make sure you are putting your self-interest at the top of your list of priorities; this vibration clearly favors the bold with good fortune.

YOUR MAJOR CHALLENGE

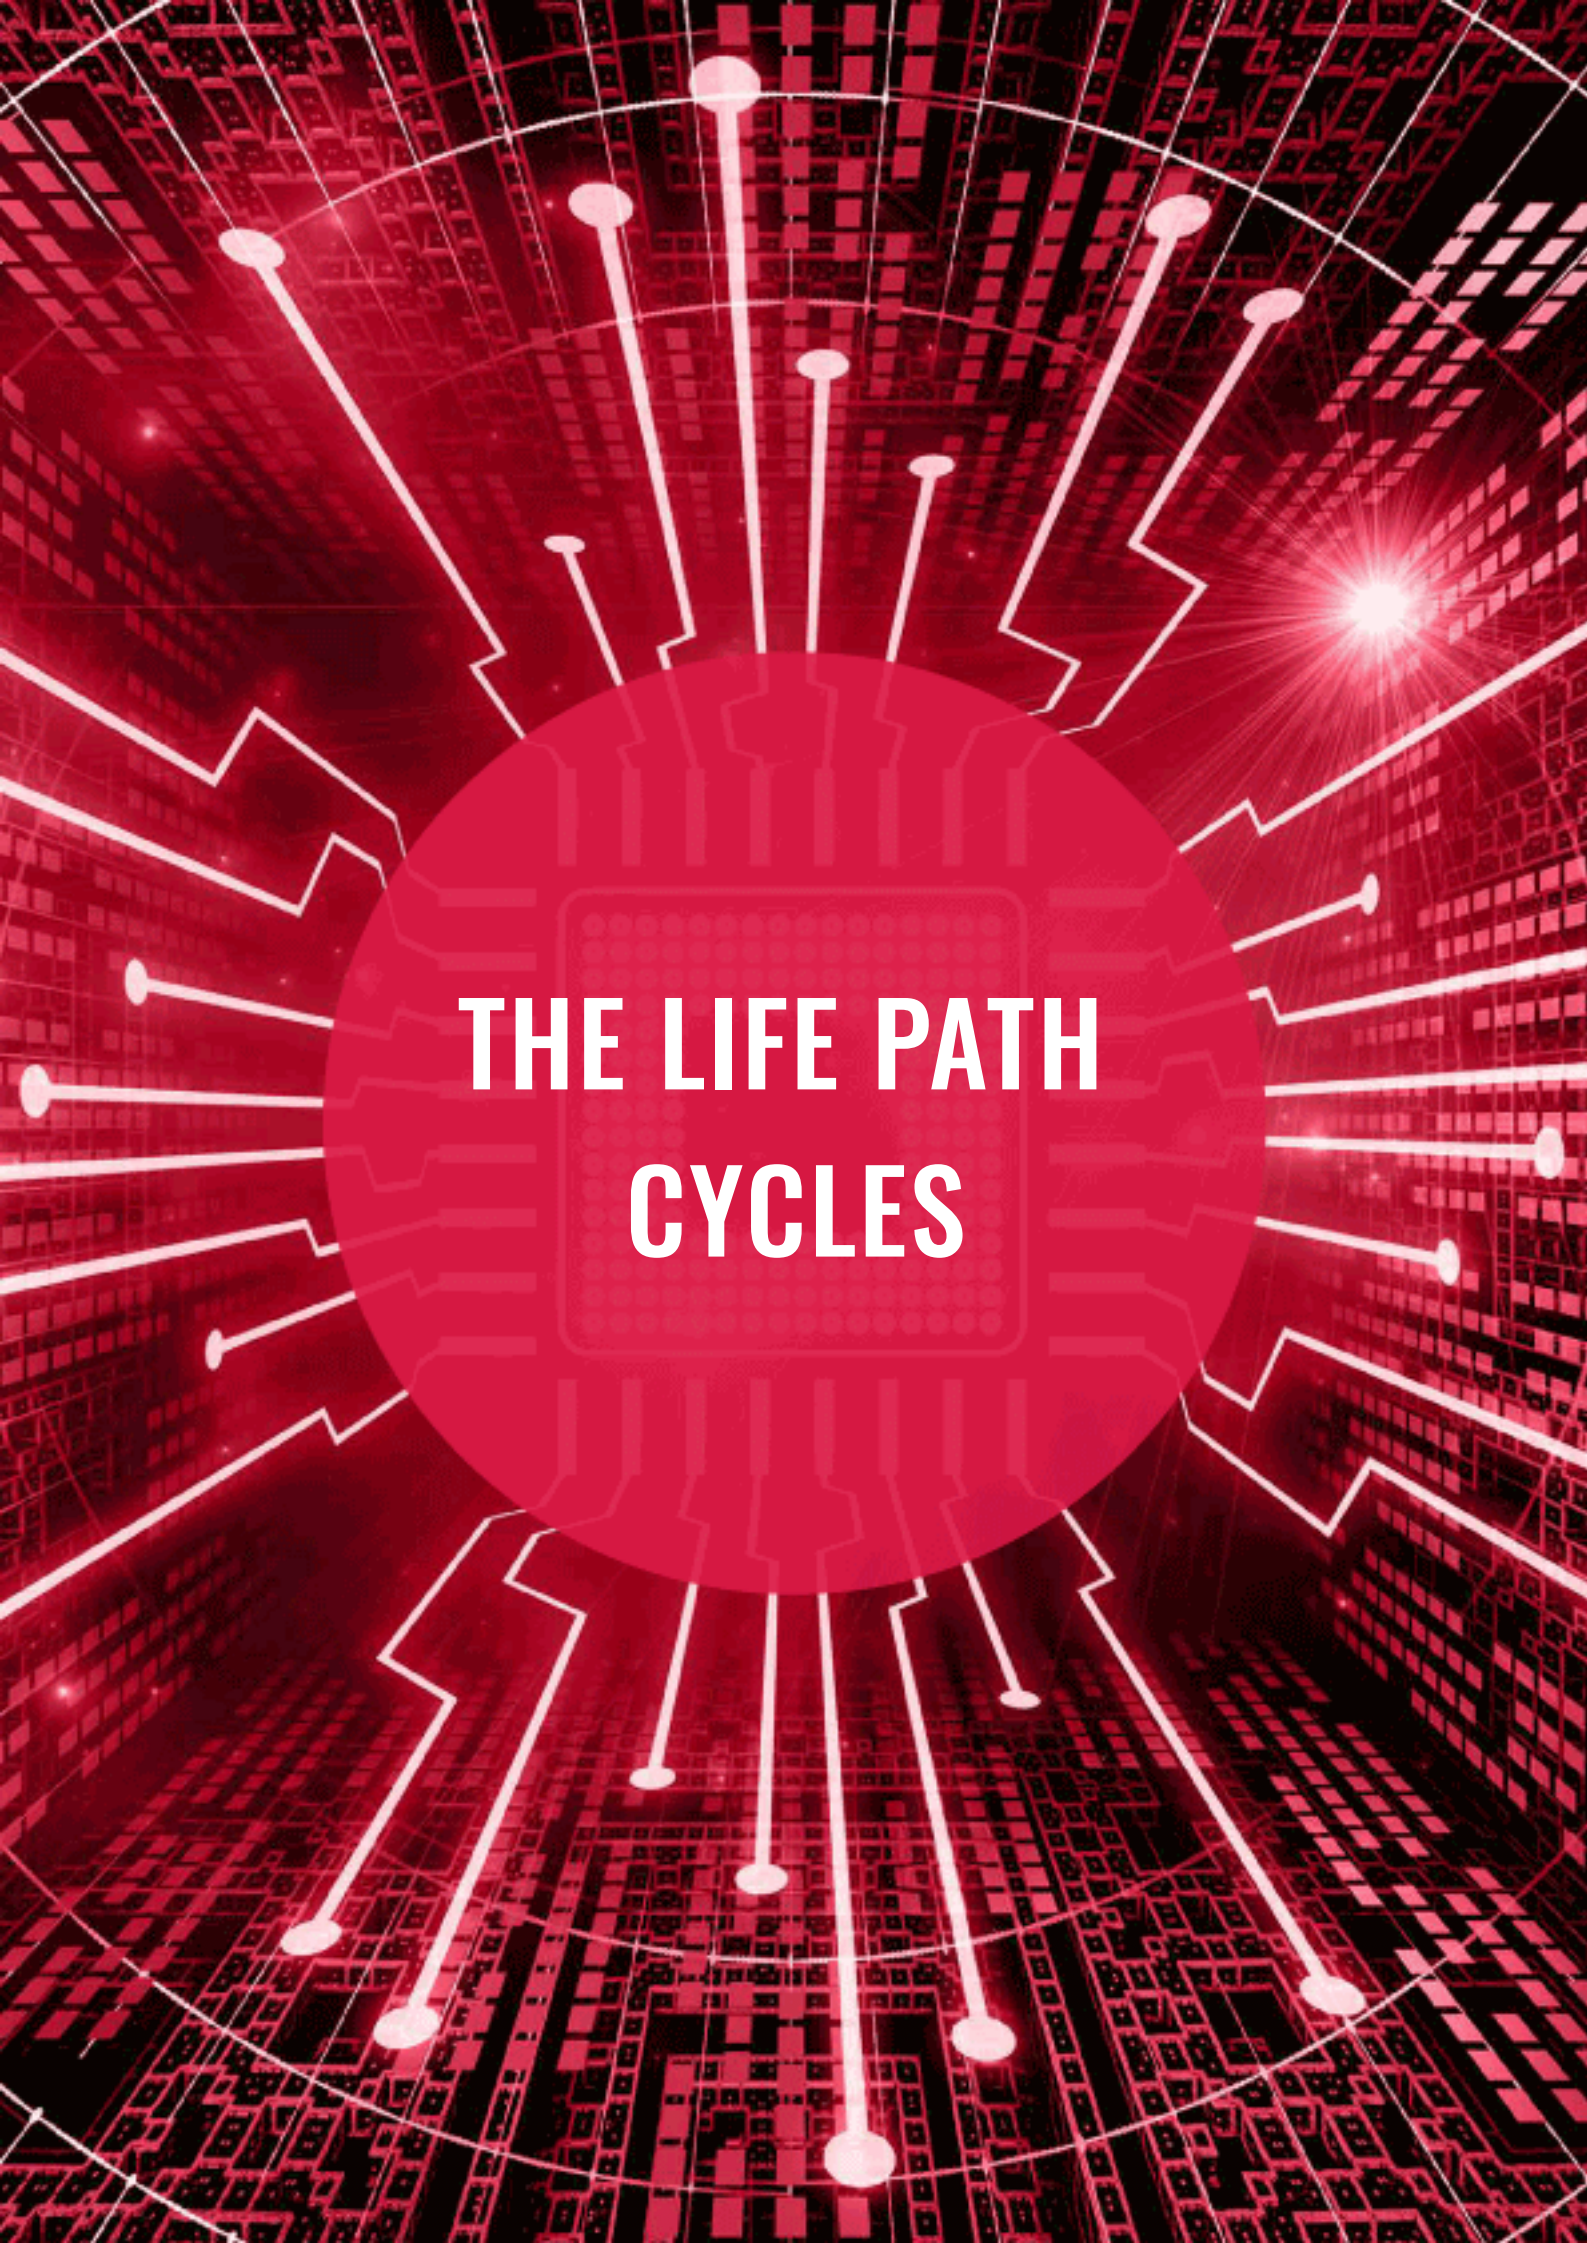

Your Major Challenge works in a different way than the two Minor Challenges. While the latter link elements of the Life Path to attract more positive circumstances, the Major Challenge bridges the two Minor Challenges in such a way as to provide an opportunity to work with a Challenge that is active throughout the lifetime. Some people find that working with the Major Challenge alone improves their overall quality of life, and that it helps to identify and work with deep, underlying issues, through which they can make breakthroughs regarding the obstacles they may face.

Working with this Challenge can be extremely rewarding, because where the Minor Challenges allow us to do the equivalent of getting extra credit in a course, the Major Challenge is more like a single test that lets us skip the course completely. Like the Minor Challenges, whatever the Major Challenge attracts to help you reach your potential will depend on your consciousness. If you view your various shortcomings as something to overcome and thereby live a more fulfilling life, you will. On the other hand, if you see them only as a cruel, fatalistic joke, then they will only intensify until you learn to change your perspective.

Your Major Challenge Number

Shlomi, your Major Challenge Number is 3.

Your Major Challenge carries the vibration 3, Shlomi, and this vibration will constantly attract situations that give you the opportunity to socialize and be more expressive. It seems that when 3 is the Major Challenge, people have the tendency to isolate, but that's the opposite strategy from what they need. The more you are able to express yourself, whether through a creative process or everyday interactions with others, the more fortunate you will be – misfortune tends to build on itself when you become withdrawn and try to be a loner. As far as socializing is concerned, this vibration may offer many opportunities, but you should only accept the ones in line with your personal or group interests, because there is a distracting nature to vibration 3 that can make it easy to go off on a tangent. It's interesting that the kind of social opportunities you attract are likely to be the right ones, especially if you judge them on the basis of what you want to accomplish, and how far the situation is from what your priorities are. Before you know it, your internal guidance system will kick in, and give you a gut feeling about people and situations which you should never deny.

THE LIFE PATH CYCLES

YOUR LIFE PATH CYCLES

Your Life Path is dynamic; it is a specific combination of universal energies that are present at the time of your birth, and has a great deal of impact on your life. **It is the sum of three distinct vibrations that you attract through the incident of birth:** the vibrations of the month, the day and the year in which you enter this plane.

Although most books on Numerology articulate the Life Path as a singular vibration that operates throughout life, the vibrations of the month, day and year also act independently. They are called Sub-Paths, Sub-Cycles or Life Path Cycles. They operate sequentially, and are roughly representative of the periods of youth, adulthood and maturity. They are calculated in a way that brings them close to two of the predictive cycles used by astrologers: the cycle of the progressed Moon, and the orbital cycle of Saturn, commonly referred to as the Saturn Return.

The first of these Sub-Cycles is called the Formative Cycle, and is of the same vibration as the month of birth. It begins at birth, and ends at the beginning of your second cycle.

The second cycle is the Cycle of Productivity, which covers the years during which you are at your most productive in terms of building for the future and establishing yourself in society. The Productive Cycle holds the same vibration as the date of birth, and begins on January 1st of the year in which you celebrate your 28th birthday. **The third, or Harvest Cycle, is what you reap from the efforts of the previous two cycles.** It begins on January 1st of the year in which you celebrate your 55th birthday. It is represented by the vibration of the year of birth, which some numerologists refer to as the Maturity Number.

These sub-paths can provide important opportunities to increase success and happiness if you tune in to their positive aspects; however, if you instead resonate with their negative aspects, they can be very troublesome. They represent the circumstances and individuals you attract to yourself, and, as you can imagine, if you are focused on the negative aspects of any vibration, this is what you will attract to yourself in ways you can't see and may not consciously understand.

These Life Cycles are very important elements along the Path of Life. They are of such long duration that they are easy to forget about, but they are always there, contributing to the matrix of forces in which you live, move and experience your being. Almost all forecasting techniques of Numerology begin with them. They are like the sets for the three main acts of a play or film, while the various vibrations of shorter cycles, such as the Personal Years or the Transit Cycles, are like the scenes within each of the three acts. Included in all of this is the character development and plot twists that combine them into a story - but all of this happens

within the context of the settings, costumes and the plotline itself.

Now it's time to discuss your three Life Path Cycles in order. They are discussed in reference to your overall Life Path, to give you a sense of how these vibrations fit into the context of your life as a whole.

YOUR FORMATIVE CYCLE

Your Formative Cycle outlines your growth and the groundwork laid for the individuation process. It also defines the circumstances which you attract at the moment of birth, through your actions during your early years, and how these interact to prepare you for adulthood.

On the one hand, the Formative Cycle provides context for positive and constructive situations which, even if difficult, build character. On the other, it addresses troublesome experiences which plant the seeds of self-defeating thoughts that can grow into unconscious obstacles which act as saboteurs during your Cycle of Productivity.

In short, your response to the vibrational combination of the Formative Cycle and the Life Path becomes the foundation for either success and happiness in your life, or the lack of it.

Your Formative Cycle Number

Shlomi, your Formative Cycle Number is 11.

Shlomi, your Formative Cycle carries the vibration of the Master Number 11, which is sometimes called "the visionary." This is a difficult vibration for young people to handle, and whether due to the influence of adults or the advice of peers, it's possible that you withdrew from the exciting promise of "a life less ordinary" and sought the security of relationships instead. Getting along with others may have been more important to you than your inner gifts and dreams, and this could have made for a good deal of tension in your early years.

However, everything probably changed during your teen years. Chances are good that you began to attract the inspiration to allow your inner gifts to flower, and the desire to do exceptional or unusual things. You're likely to have been drawn into a more intense and exciting lifestyle than the one you had previously established, or had experiences that set you apart from your peers in some way. It's possible that well before your Productive Cycle begins, that experiences you have will jump start your desire to innovate and inspire others. Many people with this Master Number as their 1st cycle begin their 2nd with a change of path, career or lifestyle.

YOUR PRODUCTIVE CYCLE

Some Numerologists consider the Cycle of Productivity to be the most important of the three Life Path Cycles, because it is during this period of life that you build the infrastructure that will determine the quality of your Harvest cycle, and therefore the rest of your life.

The Productive Cycle represents your career and interaction with the world. It represents your greatest achievements, but is, more importantly, about the contribution that you make to the lives of others for good or ill. The vibration of this cycle describes how you approach life as an adult, in whatever culture and society you happen to live. This sub-cycle is the period of time when your Birthday Vibration is being expressed most strongly, and is therefore the most personal of the Life Path Cycles. It shows how you attract opportunities to express your personal gifts and talents, and says something about the kind of feedback you will receive from the world at large. You may want to take a look at your Birthday Vibration if you want to learn more about how you can engage the positive aspects of this cycle's vibration - since it is the most personal sub-cycle, it is actually the easiest to work with.

Your Productive Cycle Number

Shlomi, your Productive Cycle Number is 6.

Because your Cycle of Productivity is of the vibration Six, Shlomi, you will probably attract and experience major changes, adaptations or adjustments to domestic life. It's a favorable time for establishing long-term relationships, and it can mean a change of residence; the nature of this cycle is such that even the ending of relationships will turn out favorably in the long run. One thing is sure - relationships formed during this vibration will not thrive if they are based on dependency and possessiveness. The pursuit of your aims and goals will have a powerful effect on your loved ones, so tolerance works better than trying to make them conform to your ideals. Another thing is that moving or transactions involving homes, such as buying or selling them, will work well for you.

This is generally considered to be an easy cycle, as long as you stay focused on your responsibilities. It sometimes is thought of as a time of settling in, whether to home and family life, or to a particular career path. The adjustments spoken of earlier are usually about adapting to something you want, but sometimes they are about adapting to changes that occur that are out of your control. Whatever the changes are that you have to make, they are something that you can do, and probably will, without too much anxiety or confusion.

Interestingly, this cycle is also characterized by a cheerful attitude and a gift for supporting others in just the right way, and chances are good that you will make your counseling,

advisory or helping skills available to others. When difficulties arise, you are likely to face them head-on and with courage, no matter if they are your own or those of your friends or family. Your people skills probably have matured, and others are likely to consider you the kind of person they can rely on and trust in.

At the same time, your willingness to help others with their problems may work against your best interests, unless you put yourself first. In fact, you may have to change your plans more than once in order to accommodate the needs and wishes of others, and doing so may cause problems in professional or domestic life. Although you may face many trials of this type, they will be overcome through the support of a partner or spouse.

YOUR HARVEST CYCLE

This cycle, which includes the rewards reaped from your efforts and actions during the previous two cycles, lasts from its beginning until the end of your lifetime. In other words, during this part of your life, you don't necessarily attract anything new; you rather attract all of the unused "karma" from your actions earlier in life. This is therefore a period during which you can experience life in two ways. You can either work with your various challenges to make sure you get the best from the vibrations which have remained underused; or you can sit back and randomly accept whatever comes from the "upside" or "downside" of the vibration it carries.

As you might guess, this portion of your Life Path provides opportunities, but by now you should have a good idea of how you can bring what you want into manifestation; if not, you should be gaining the experience that enables you to recognize which actions you take attract what you don't want. Many people treat the latter part of life as a period in which they live out of habit and are driven by the momentum of the past. This is not a good practice - in fact, it may be the worst possible approach to enjoying a happy life in your later years.

Some people choose to give something back to the world by sharing the wisdom they have accumulated in some way with others, usually as a parent, mentor, teacher, or guide. Others choose to continue what they have been doing, often accepting whichever opportunities or offers they receive as recognition for their earlier contributions. Numerology shows, however, that one does not have to choose between the different patterns which lay out a roadmap for the future; to the contrary, you can choose the future that you want, as long as you first know what you want and then make an effort to attract it.

Because the possibilities of the Harvest Cycle are open-ended, the only thing that you need to decide is whether you want to shoulder the negative aspects of the vibration it bears, or whether you want to align your experience with the best possible aspects of the vibration. Even after you enter this cycle, you can change its course. All you have to do is recognize whether or not you are experiencing the results of focusing on what you don't want, as opposed to reaping the benefits of what you do. With enough awareness, you can always change your mind.

The explanation of your Harvest Cycle that follows will therefore concentrate on both the positive and negative aspects of the vibration, so that you can see not only where to concentrate your energies in the present, but can also diagnose which of the possible downsides you need to work on so that you can build up the "momentum of mindfulness" which will create the kind of Harvest Cycle you truly desire.

Your Harvest Cycle Number

Shlomi, your Harvest Cycle Number is 7.

Because your Harvest Cycle is of vibration Seven, you are likely to want nothing more than to get away from the “rat race” once it begins. Many people of this vibration want more private or calming surroundings, but not necessarily to stop working; there could be a more private side to your work or your goals that don’t require a daily commute or punching a time-clock.

You’ll probably find a way to make your environment more peaceful, and give yourself more time to pursue personal interests, hobbies or inner growth, or that you’ll focus on spending more time with your loved ones. Many people who work primarily with the mind or imagination have this vibration, and if you’re deeply involved in the world of commerce and business, chances are good that you’ll no longer enjoy the hustle and bustle of it all. The pace of your activities may slow down due to the circumstances you attract, and even if you don’t think you want it to in the beginning of the cycle, the changes that this vibration brings will affect every aspect of your life in a positive way, improving your well-being and gifting you with wisdom.

The quality of this vibration is peaceful and solitary, but it will not work against your relationships. In fact, the increase in privacy and intimacy may actually improve the ones most important to you. You’ll probably notice that all of your relationships deepen and take on a new richness after the new cycle begins. This vibration may change the pattern of your social life, and the tranquility of it may take you some time to get used to. You’re likely to focus on a shared, but special interest with others, to help you maintain that social environment that you crave.

As long as you are flexible enough to go with the flow of this vibration, and focus on achieving your personal goals in life, it will favor you in many magical ways. If you try to force it into a preconceived mold, however, you may find resistance in all your material endeavors. In other words, make plans for a more relaxed time that gives you room to enjoy more peaceful or intellectual pursuits or to experience the mysteries of life in new and exciting ways. You won’t be disappointed, and will attract success and happiness if you do.

YOUR LIFE PATH CYCLE SUMMARY

Your Life Path Cycles should never be ignored. Although there are only a few life cycles you experience, they set the energetic tone for these important periods of your life. Refer to the current cycle you're in any time you want to gain a better understanding of the underlying tones or trends that are taking place. Remember, knowledge and a new perspective is a powerful tool for positive change!

THE PINNACLES

THE PINNACLES: WHAT THEY ARE & HOW THEY'RE CALCULATED

The Pinnacles are periods of time during which you will attract various opportunities based on the numeric vibrations that they carry, but they happen to be very potent manifestations of those particular vibrations. Since getting the best out of your Pinnacles is not always easy, some writers refer to them as Attainments.

Each Pinnacle is like a distant point on the landscape that you will eventually reach, and, according to the choices you make, what you will receive when you get there. In other words, **your Pinnacles usually describe the “reward” you earn for working with the vibration that you attract during their cycle.** Psychologists of the Jungian School have a term that is well suited to this idea: they use “integration” to describe how concepts, feelings and strategies that aid in the relationship with the self, others and the world become a part of us as we grow and experience life. This is almost exactly what the scholars who developed the modern system of Numerology described when they discovered the Pinnacles.

Since they are part of your Life Path, these four vibrations cannot be changed, but your choices and actions determine whether or not you experience their more favorable aspects.

If you do not choose to consciously direct your own destiny through your own efforts, it will be nearly impossible to attain the potential of each Pinnacle, which will lead to the more negative aspects of its vibration manifesting through your circumstances and environment.

As mentioned above, there are four Pinnacles which occur in your lifetime, each having one of the numerical vibrations that you attract during their years of operation. These can be seen as “Attainments,” the idea being that you must strive to reach the highest quality of these vibrations that you can. We realize today that these vibrations can generate either their lowest or their highest qualities whenever they manifest; **all that we have to do is to “tune in” to the quality that we want to attract with our choices and behaviors.**

Most good numerologists place the most emphasis on Pinnacles 2 and 3, because during the 18 years they are in power, you can use their particular qualities to establish yourself in the world and lay the groundwork for your future.

How they are calculated:

The four Pinnacles end on specific birthdays which are specific to your Life Path vibration. Your First Pinnacle, or Pinnacle of Attainment, lasts from birth until your 27th birthday. The Second Pinnacle, or the Pinnacle of Obligation, lasts until your 36th birthday. Your Third Pinnacle, known as the Pinnacle of Foundation, lasts through your 45th birthday when your Fourth Pinnacle, or Pinnacle of Retrospection, begins. This final Pinnacle lasts for the remainder of your lifetime.

It should be mentioned here that the Pinnacles are considered by some authors to be the second-most important aspects of the Numerology chart after your Life Path.

YOUR FIRST PINNACLE: THE PINNACLE OF ATTAINMENT

The first Pinnacle is of great importance in the study of your character, because it describes the developmental experiences of your life, your attitudes about achievement, and the development of your sense of self. It is about your beginnings and which primary formative forces influence your early life the most. This can involve childhood or early adult trauma, but can also be about victory and early accomplishments. In many ways, this is the vibration that sets your life in motion. By the time it is over, you're likely to have "found yourself" and set the direction for much of the rest of your life.

Your Pinnacle Of Attainment Number

Shlomi, your First Pinnacle Number is 8.

Having the Attainment vibration "Eight" during the first Pinnacle usually attracts conditions that cause a young person to push for success and accomplishment earlier than most of their peers, Shlomi, and this drive will remain with you into your adult years. It would not have been hard for you to gain some degree of power and influence during your early years, no matter what culture you belong to. Many career oriented goals, including education, will be easy to accomplish during this Pinnacle. You may have even become quite an expert at getting your way with others, and although you may not have noticed, the "take charge" attitude you developed can be of benefit as far as the fulfillment of your wishes is concerned.

As far as the financial aspects of this position are concerned, it is a sign of extremes. Usually, when people have vibration "Eight" as the Attainment of the first Pinnacle, the prevailing financial conditions are such that material success is seen as the sole goal in life. Sometimes one is born into a family in which the philosophy that "material success trumps all other considerations" is the rule rather than the exception. Nevertheless, the gift of this Pinnacle's vibration is gained through learning how to focus on the effort, not on the reward. You will find that your path to success can be deliberate and active, but not materialistic: the more compassion you have for others, the better you will fare.

No matter how others may disappoint you, you'll learn that things always turn out better if you give them the benefit of the doubt, rather than taking matters into your own hands. You can't do it all yourself, neither can you wait for opportunity. You need to take action and succeed or fail, but success will come only from your discipline, compassion and effort, not from good luck.

YOUR SECOND PINNACLE: THE PINNACLE OF OBLIGATION

During the nine year period of your Pinnacle of Obligation, you will attract — according to the nature of its vibration — circumstances that engage you in the fulfillment of your obligations to society, no matter what culture you may be a part of. You are likely to begin participating more fully in community life, and spending time reinforcing the social bonds between yourself and others; or, you may focus entirely on fulfilling your basic need for contribution to, and participation in, the world at large.

Your Pinnacle Of Obligation Number

Shlomi, your Second Pinnacle Number is 4.

Because your Pinnacle of Obligation is of the vibration “Four,” Shlomi, you are likely to attract limitations in some areas of your life. They are most likely to come in the form of delays, obstacles and frustrations of your plans. The nine years of this Pinnacle are likely to be remembered as being a time during which only hard work would get even the simplest things done. But there is a powerful and positive advantage to this Pinnacle, in that none are better for focusing on building a strong foundation for your future.

Things you establish during this time will tend to be solid and stable; there typically aren’t nasty surprises hiding behind this vibration. But don’t expect to get by on windfalls, gifts, luck, or the kindness of others, unless these things are the results of your hard work and efforts. Patience and careful attention to details will help you get the best possible outcomes in all matters, especially to your physical well being. Learn something like meditation or breathing exercises that can help you reduce the side-effects of stress. This Pinnacle may be hard on relationships unless you give plenty of time to your friends, family and partners of all sorts. Give your all to everything you do, but don’t feel obligated to go out of your way to perform chores for others that may become burdens – people are likely demand more of you during these 9 years. It’s not up to you to fulfill their demands, and this will become very clear if you remain focused on what you need to do to create the future you want.

YOUR THIRD PINNACLE: THE PINNACLE OF FOUNDATION

Some numerologists consider this to be the most important of the Pinnacles, because during these 9 years you will be constructing a foundation for the remainder of your life. Working with this Pinnacle can increase both the length and quality of your life, because your actions at this stage can help to attract the supportive and healthy biological and psychological conditions that are so important for developing energy and resilience as you age. Working against this Pinnacle by denying the opportunities that are attracted to you will only increase the kind of baggage that will slow you down on the road to happiness. A positive attitude toward yourself during this Pinnacle can go a long way in making your future quite pleasant.

Your Pinnacle Of Foundation Number

Shlomi, your Third Pinnacle Number is 3.

Three is quite a fortunate vibration to have during the Pinnacle of Foundation, Shlomi. The increase in social activity, popularity, creativity and communication at this time is usually a sign that business matters have reached the stage that they are taking care of themselves. If that's not how things are working out, others will appear in the life to help you become more solidly grounded financially. This is a good thing, because it's easy to forget or ignore details during pleasant times like these.

You become fairly easy to please now, and because of that you can use the contagious nature of your enthusiasm to your advantage. At the same time, other's enthusiasm will be contagious, so you really need to stay on track with your plans. You may pursue a leisure activity (or return to school) to enhance your ability for self-expression, or to develop an alternate route for doing so, as in taking courses to improve your skills. There may be at least one major renovation or change of residence during these nine years.

YOUR FOURTH PINNACLE: THE PINNACLE OF RETROSPECTION

The Fourth Pinnacle begins at the conclusion of the Third Pinnacle and lasts for the remainder of your lifetime. It is therefore not only a time for reflection, but also for harvesting all the benefits, knowledge, experience, well-being and prosperity which you've acquired so far into a coherent and self-sustaining whole that provides energy to fuel your inner life, your physical body, your drive and your motivation.

If you're lucky, this won't be a time laden with regret, but will rather be filled with opportunities to be who you really are, the sum total of everything you have gathered into your life and the things and circumstances that you've projected into the future. Your personal efforts will then be directed towards having the best quality of life possible. Many people become deeply involved in spiritual practices or philosophical interests during this part of their life.

Your Pinnacle Of Retrospection Number

Shlomi, your Fourth Pinnacle Number is 9.

Some may think that the vibration Nine during the Pinnacle of Retrospection makes for too much excitement or business, Shlomi, but nothing could be less true. You can expect successful ventures and enjoyable adventures, as your last Pinnacle is one of expansion, during which your boundaries are steadily expanded. This can be a time of moving beyond previous limitations and opening into a whole new perspective on life – one that is more fluid and balanced and almost unlimited in opportunity.

You might be surprised by the opportunities you attract, because they can offer you the chance to enjoy previously unavailable travels or other mind-expanding activities of either a material or spiritual nature. At the very least, it will bring success in things you have been working toward, as long as you can let go of your self-imposed limits or the attitudes that anchor you in the past. This Pinnacle can attract the circumstances or people that will help you let go of whatever no longer serves your growth and the expression of your potential. You may even decide to let go of the past by using it as a vehicle to help others in some way or another. As long as you know the difference between loss and sacrifice, this Pinnacle can be brilliant.

YOUR PINNACLE SUMMARY

You should recognize by now how important your Pinnacles are. Being able to act in such a way that brings out the best aspects of these time periods can raise your life to a whole new level, one that is fulfilling and successful.

It doesn't matter whether you're in your 1st or your 4th Pinnacle — there are always ways to turn things around so that you can enjoy the gifts you were given at birth.

The background is a complex, abstract composition. It features a central blue circle with the text 'THE BIRTH DAY NUMBER' in white, bold, sans-serif font. Surrounding this circle is a dense, swirling pattern of geometric shapes, primarily triangles and polygons, in shades of blue, green, and yellow. The overall effect is a sense of dynamic movement and depth, resembling a stylized, futuristic cityscape or a complex architectural structure viewed from above.

THE BIRTH DAY NUMBER

THE BIRTHDAY NUMBER: WHAT IT IS & HOW IT'S CALCULATED

The Birth Day Number is one of the 5 powerful core numbers in your numerology chart. It is sometimes referred to as the “Psychic” or “Ruling” Number because it **reveals an in-depth understanding of your true self**. In many ways, it explains the nature of your existence and makes sense of the events that unfold in your life.

How It's Calculated

Your Birth Day Number is calculated by reducing the sum of your birth *day* to a single digit.

Here's an example:

1. Someone born the 28th day of any month will have a Birth Day Number of 1.
2. We arrive at that number by adding the two digits of the birth day together.
3. So, $2 + 8 = 10$
4. Since the result is a double digit sum, we continue adding until we arrive at a single digit.
5. So, $1 + 0 = 1$
6. In this example, the Birth Day Number is 1.

Let's take a look at another example:

1. Someone born on the 15th of any month will have a Birth Day Number of 6.
2. Again, we add the two digits of the birth day together.
3. So, $1 + 5 = 6$
4. Since a single digit sum is achieved with one calculation, no further addition is required.
5. In this example, the Birth Day Number is 6.

Here's one last example:

1. Someone born on the 7th day of any month will have a Birth Day Number of 7.
2. Since 7 is already a single digit, no calculations are needed.
3. In this example, the Birth Day Number is 7.

The Master Number Exception:

In the case of calculating the Birth Day Number, all numbers reduce to a single digit and the usual Master Number exception does not apply. That being said, if you have a Master Number in your Birth Day Number, your personalized reading takes this into account.

What Your Birth Day Number Reveals

Unlike the numbers derived from your name, your Birth Day Number will never change. It is a static number that interacts with your Life Path to **create different vibrational cycles you'll naturally experience throughout the duration of your life**. This number is so powerful, some expert numerologists suggest people change their name based on the Birth Day Number to improve their inherent luck and overall happiness.

The Birth Day Number has a strong influence on your Life Path, which must be accounted for in your reading. So we've included information not *only* about your specific Birth Day Number, but also examine how your unique Birth Day and Life Path Numbers *combine* to massively influence your life. Think of your Birth Day Number as a way to decode the shortest way to your ideal Life Path just like the degrees on a compass reveal the direction you're facing and the quickest path to your destination!

This number explains how you handle the opportunities and challenges that present themselves throughout your adult life. Intimately understanding and aligning with this vibration in your chart **can help you make better and more empowering decisions in all areas of your life** and open the road to more success, happiness and prosperity.

YOUR BIRTH DAY NUMBER

Shlomi, your Birth Day Number is 6. You'll attract many opportunities to achieve, and will be quick to capitalize on them. Unlike people who are ambitious and constantly seek the acknowledgment of others, it's the expression of love and the spirit of cooperation that enables you to attract comfort and security into your life.

Sometimes, this vibration will attract the attention of others who wish to give you their problems; when it comes to doing a favor you may find it difficult to say no. But this vibration also attracts opportunities to act in your own best interest, and when you "pick up" on that current, you'll attract what you need and desire, instead of opportunities to sacrifice your own time and good fortune for someone else's benefit.

You may find that you attract anxiety filled situations centered on the issue of doing things perfectly, which could lead to manipulative attitudes that don't bring good results, but if you stay focused on your well-being, instead of what others think is right, you'll find these situations disappear.

Since both your Birth Day and Life Path Vibrations are Six, Shlomi, you tend to take on too much responsibility and may end up having problems in relationships as a result. Sometimes this may be because you care so much about others that you'll tend to take their problems on as your own. At others you may be too authoritative or too much of a perfectionist, and when power struggles start in a relationship, this means real trouble.

During your adult years, however, those sorts of problems seem to fade into the background, because you'll probably be attracting good fortune as far as business, money and career are concerned. As long as you make an extra effort in order to help your partner feel special and needed, you can be certain you'll attract good luck with money.

Since you were born on the 24th of the month, your Birth Day Vibration can be written as 24/6 because it has a special quality. It has all the properties of its Fadic number, 6, but has a restless quality that attracts a lot of activity into your life.

On a much lighter note, every Birth Day Number is said to have fortunate years, months and days associated with it, according to some of the older traditions.

This is an "old school" method that reduces all birthdates to their final single digit sum, which has proven to be effective for this purpose.

According to this tradition, the years that reduce to 6 – such as the 6th, 15th, 24th, 33rd, 42nd, 51st, 60th, 69th, 78th, 87th and 96th years of life, should be your best years. Take note that

the 15th year of your life begins on your 14th birthday, because the day you were born is the beginning of your 1st year of life; your first birthday is the beginning of your 2nd year of life, and so forth.

During April, May, September and October good fortune may come your way, but you should be careful about dietary matters and other physical stress during February, March, August and September. Some of the fortunate and stressful months overlap, but this is because your good fortune may come in the form of extra work, or difficulties connected with pursuing or completing a difficult but satisfying task, or having "too much fun."

Your most fortunate days of any month are the 6th, 15th, and 24th, especially when they fall on a Friday, which is said to be your most favorable weekday.

Again, this is Numerological lore from old traditions, so have fun with it, but don't let opportunities pass you by, or fall prey to false promises just because it happens to be a certain month or day.

THE ACHIEVEMENT NUMBER

THE ACHIEVEMENT NUMBER: WHAT IT IS & HOW IT'S CALCULATED

The Achievement Number represents an extremely important vibrational pattern in your Numerology Chart. It acts in such a way that it provides certain challenges and their solutions for every other number.

Kevin Quinn Avery, D.Ms. was the first modern author to write at length about this chart element. He said:

"The Achievement is what must be accomplished in life... Until the Achievement is obtained, there will be tension in the life causing negativity."

He was not the only numerologist to place great importance on this number; some practitioners of the Chaldean school refer to this number as the 'Life Path', and only consider what we call the Life Path today as the first Personal Year.

When one attains the fullest expression of this number, obstacles to a prosperous and happy life become less difficult to work around or overcome. This truly exemplifies achievement in both the material and spiritual sense.

How To Calculate Your Achievement Number:

To calculate your Achievement Number, we used the formula below. Note: Achievement Numbers follow the standard 9 numbers used in Numerology (1-9), the Master Numbers (11, 22 and 33) and the Karmic Numbers (13, 14, 16 and 19).

Steps To Calculating Your Achievement Number:

1. Start by writing down the number of your day of birth.
2. Then, write the number of your month of birth.
3. Now we add them together.
4. If the sum of your birth month and birthday is between 1-9, you have found your Achievement Number.
5. If the sum of your birth month and birth day is a double digit number, continue to sum the digits until you arrive at a single-digit number between 1 and 9. Unless the resulting number is the Master Number 11, 22, or 33... or Karmic Numbers 13, 14, 16, or 19.

YOUR ACHIEVEMENT NUMBER

Shlomi, your Achievement Number is 8.

Shlomi, your Achievement Number is 8. Eight is, in all systems of Numerology, considered to be a vibration that concerns money and power, and chances are good that you are concerned with both. The reason that both take precedence is that 8 is all about control, and the attempt to gain control over your life and your future.

Although this is a very security-conscious vibration, you may switch from being a spendthrift to being a penny-pincher from time to time. Occasionally you'll attract news or situations that stimulate a fear of poverty, and at other times, you may feel that you're not being recognized for your true worth, either at work or at home. One of your major life lessons is to learn that you cannot demand recognition, it's something you earn by living your life in the way you truly want to live it, and then you'll attract those who are willing to follow your lead. It's also important that you add compassion and empathy for others to the list of things you pay attention to; you'll find that you attract prosperity and abundance only if concern for the well-being of others is part of your bottom line.

Anyone with an Achievement of 8 is known to have strong managerial skills and leadership abilities, Shlomi, and you need to learn that "walking your talk" strengthens your ability to make things happen, because you'll attract the people and the resources that you need into your life. Try to avoid doing everything yourself; others will appreciate the chance to show you their skills, or participate in your success.

NEXT STEPS

HOW TO MAKE NUMEROLOGY A PART OF YOUR EVERYDAY LIFE

Shlomi, your Deluxe Numerology Report has given you a closer look at your Numerology chart. When you look at the deeper meanings of the numbers in your chart, you'll gain a better understanding of how you think and why you act the way you do.

The next step in your Numerology journey is to use this abundance of information on a daily basis to fulfill your spirit and bring more joy and happiness into your life! We suggest you use your new-found knowledge as a tool to cultivate your self-awareness and confidence in the person you are.

This powerful report combines 67 advanced numerology calculations with the science of Sacred Geometry, making it the most advanced yearly numerology forecast available anywhere. What makes this report extra powerful is that it's based on not only your date of birth and name, but also on the corresponding universal patterns present over the next 12 months.

HERE ARE A FEW TIPS TO HELP YOU STEP INTO THE FUTURE WITH EASE:

Tip #1: Make Decisions Aligned With Your True Self.

As you learn how to make decisions that align with your true nature, you will feel accomplished, uplifted and inspired. Make sure to really pause and listen to your thoughts and feelings to understand what your true self is saying. As you practice this, you will begin to establish a trusting relationship with yourself and be able to make decisions with more confidence than you ever imagined!

Tip #2: Re-Read Your Report.

We know it can be overwhelming to receive all this information. There are TONS of golden tidbits riddled throughout your report just waiting to be discovered! Try reading this report one section at a time - maybe before bedtime or with your morning coffee. However you choose to read your report, we suggest you come back to your report more than once to help you get the most information. You may be surprised at what you've missed!

Tip #3: Start A Reflective Practice.

Integrate Numerology into your journey using reflective practices. You may choose to reflect on what you've read or maybe you notice something about yourself or your environment that

reminds you of your Numerology chart. How does it make you feel? What surprised you? What are you proud of? Are you resisting anything? There are many ways to reflect. You might choose to write it down, meditate on it, or draw a picture!

Tip #4: Remember To Have Fun!

Your Numerology chart is a great way to take a closer look at what makes you unique. Find playful ways to bring Numerology into your life like sharing your new insight with your friends and family!

As you discover more about your unique combination of numbers, you are sure to uncover moments of excitement, challenge, opportunity, and enlightenment! We'll be right by your side all along the way.

Many Blessings,

The Numerologist Team
